GENERAL INSTRUCTIONS

The form of the consolidated balance sheet is identical for all institutions regardless of size and type. Consequently, certain balance sheet categories may not be applicable to some institutions because of the nature of their operations.

Where these instructions indicate that a certain category includes particular items, the particular items listed do not limit the generality of the heading but indicate the kind of items that are to be reported there.

Assets under administration are not to be included in the balances reported on the balance sheet.

Assets are to be reported net of the allowance for impairment, if any.

All allowances are to be netted from the appropriate assets in the same currency in which the relevant assets are denominated, regardless of whether the allowances are booked in Canadian or foreign currency. Where allowances for impairment against groups of loans have been established against assets denominated in both Canadian dollars and foreign currency, the allowances should be allocated proportionately according to the gross amounts of the assets outstanding in the various currencies.

Interest should be accrued on loans; the accrual is to be included in Asset 6. Debts purchased at a premium or discount are to be reported net of the premium or discount. The net reported amount of such loans will be increased or decreased as the discounts or premiums are taken into income over the term of the loan. Fixed-term loans on which the interest for the term is pre-computed and added to the principal are to be reported net of the pre-computed interest.

Deposits with regulated financial institutions include all non-interest-bearing balances and interest-bearing balances, including correspondent relationships in Canada and elsewhere placed in the normal course of market trading where the only documentation exchanged is a confirmation of contract and the rates applied are the bid and offer of the market.

Insurance-related Assets comprise certain asset categories from Insurance Subsidiaries that do not readily fall into the asset categories used in institution financial statements. Examples are given in the detailed instructions for Asset 6(a).

Assets of Insurance Subsidiaries such as securities and mortgages that readily fall into the asset categories used by institutions are to be reported in these categories.

All amounts are to be expressed in thousands of Canadian dollar equivalents.

Companies are required to prepare their quarterly and annual financial statements in accordance with IFRSs for fiscal years beginning on or after January 1, 2011. The reporting package has been revised for all filers which are now reporting under IFRS. References to CGAAP have been removed.

Increases in the carrying value and the accrual of the gain into income are to be permitted only in those circumstances where there is virtual certainty that the gain arising from the put option or the offer to purchase will be realized.
