TAB 1

FEDERAL COURT OF CANADA

BETWEEN:

Radu Hociung

Plaintiff

and

**Minister of Public Safety and Emergency Preparedness
and
Canada Border Services Agency
and
Her Majesty the Queen in Right of Canada**

Defendants

**WRITTEN REPRESENTATIONS OF THE PLAINTIFF
(Defendant's Motion for Summary Judgement)**

SUBMISSIONS

1. The Defendant's Motion for Summary Judgement, seeking to dismiss the action, is a materially identical motion to his August 30th 2016 Motion to Strike the Statement of Claim, which was unsuccessful.
2. The present motion is unnecessary and vexatious. As a result, the plaintiff seeks that the action be determined on its merits, based on the evidence adduced herein pursuant Federal Court Rule 214, and that costs on the motion be awarded to the plaintiff on a substantial indemnity basis.
3. In his Motion to Strike the Statement of Claim, the defendant, proposed, as he does in this motion, that the *Currency Act* section 8 shows that the coins in question are not currency. As he did on that motion, the plaintiff states that section 8 does not define currency, but rather states how currency, defined in section 7, may be used for payments, and that it explicitly states that coins of denominations \$1 and \$50 may be used for payments. The Defendant claims that s.8 states the opposite of what it does.
4. In her decision on the Motion to Strike, Madam Prothonotary Martha Milczynski, referring to the defendant's claim with respect to *Currency Act* section 8 noted that the defendant's argument in fact goes to the merits of

the case.

5. The defendant still makes that claim, and provides no additional evidence in support of his case, and therefore has no reasonable expectation of success on this motion. This motion is therefore unnecessary.
6. The motion also comes at a time when discovery of the defendant is still in progress. Discovery started on July 19, 2016, and the defendant had used several delay tactics to avoid discovery: the motion to strike, a 6 month delay, and various improper statements of objection to the questions asked. His delays have forced the plaintiff to request Case Management, which was granted. This motion comes one day prior to a Case Management conference scheduled for March 2nd (TAB 74). The agenda for the March 2nd conference were largely requests by the plaintiff that the defendant be ordered to fully answer the questions asked on July 19, 2016, and to answer the questions arising from the partial answers provided on January 31st, 2017. After filing the motion, the defendant requested from Case Management that discovery be suspended until this motion, and a motion brought by the plaintiff to amend the statement of claim, are determined.
7. From the timing of the motion, it is clear that the defendant's purpose is not to have case determined, but to stall discovery and prevent discovery of further evidence. Therefore, his motion is vexatious.

Coins not subject to *Customs Act* provisions

8. The only statute that gives the *Customs Act* authority to impose, levy and collect taxes and duties on imported goods is the *Excise Tax Act* ("ETA") s.50(1) and s50(1)(b) (TAB 5). This section applies only to "goods", while the coins that make the object of this action and the Minister's Decision are "currency". Therefore, as the *Customs Act* does not apply to currency, the Minister's Decision is incorrect and should be set aside.
9. Even if the coins were "goods", ETA s.51 (TAB 5) states that tax imposed by section 50 of that Act does not apply to the importation of goods mentioned in Schedule III, also meaning that section 50(1)(b), which states that the *Customs Act* governs the paying of import duties, also does not apply to Schedule III goods. (for greater clarity, the *Customs Act* does not apply to Schedule III goods)
10. Schedule III, Part XI of the *ETA* (TAB 6) lists the following:
 3. British and Canadian coins; foreign gold coins
 4. Coin of any metal, of authorized weight and design, issued for use as currency under the

authority of the government of any country.

3. While para 3 of Schedule III Part XI applies to the gold coins in question, para 4 applies equally to the gold and silver coins, having been issued for use as currency under the authority of the United States government (per U.S. Title 31, see TAB 13).

4. Schedule III, Part XI makes no reference to the fair market value of any items, thus the “true” or denominated value of coins is of no consequence in the exemption determination.

5. Also, *ETA* section 212 (Importation Tax, TAB 5) does not apply to imported coins because section 212 applies only to persons “liable under the *Customs Act*”, and the plaintiff is not liable under the *Customs Act* thanks to section 51 of the *ETA*. Furthermore, there is an overlapping exemption for the importation of precious metals, in the form of section 213, which states that the tax on importation of goods does not apply to goods listed in Schedule VII of the *ETA*. Precious metals as defined in s.123 for the *ETA* are prescribed goods pursuant Schedule VII sec. 8, as prescribed by *Non-Taxable Imported Goods (GST/HST) Regulations* para 3(a) (TAB 9). The effect is that the importation of coins (precious metal or otherwise) is not subject to the *Customs Act* at all.

6. Thus, the plaintiff was not required to report the coins seized by the CBSA (see Seizure Report, TAB 2) pursuant section 12 of the *Customs Act*, and the seizure is improper.

7. The Minister's Decision supporting the seizure, dated June 1, 2015 (TAB 4) should therefore be set aside.

8. In fact, not only is the Minister's Decision wrong, it is so wrong that using it as an excuse to avoid reporting requirements pursuant the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act* (“*PCMLTFA*”) s. 12 is a crime, and an offence contrary to section 74 of the *PCMLTFA*, as found in Canada v. Nawaya, BC Provincial Court case 179965 (TAB 27), which finds gold coins to be currency or monetary instruments, and subject to the *PCMLTFA*.

Fraud And Threats Committed by BSO Debski

9. In his narrative report, written at the time of seizure (see TAB 18), officer Debski indicated his understanding that the coins in question were “technically currency”, but went on to explain he would not be treating them as such.

10. While he understood that the coins were currency, during the conversation with the plaintiff, he insisted that they were “goods” subject to reporting under the *Customs Act*.

11. As he understood the coins were currency, the officer conducted a search of the plaintiff’s wallet, looking for more currency, in the hope that he would find a total of over \$10,000, which would have allowed him to confiscate it all pursuant the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act* (“PCMLTFA”) - see copy of the plaintiff’s Citizenship card (TAB 19), which the plaintiff keeps in his wallet. The officer stated in his narrative report that he only requested the plaintiff’s keys, passport, driver’s licence, ownership and the gold coins (TAB 18, page 2, para 3), but the fact that he also made a copy of the Citizenship Card proves he requested and searched the wallet.

12. The officer asked a further question, betraying that he was of the mind that he was dealing with currency rather than goods. He asked “Where do you have so much money from”, (TAB 20, question 20). This is clearly a question of provenance of funds, (see CBSA Customs Officer’s Enforcement Manual, TAB 22, para XXX). This question is not relevant for Customs Act purposes, ie, the Customs Act is not concerned with how goods were purchased, but it is relevant to for PCMLTFA purposes to assess whether there is reason to suspect the money may be the proceeds of crime (see TAB 22, CBSA PCMLTFA enforcement manual, para 85), instructing that the officer must gather reasonable grounds to suspect, in support of a seizure with no terms of release. The officer admitted in response 20 of the Discovery of the Defendant (see TAB 20, answer 20) that the question was not pertinent to the seizure action, which was a Customs Act seizure, leaving the PCMLTFA as the only other Act to which the question was pertinent.

13. As the officer was unable to establish grounds to suspect the gold and silver coins proceeds of crime, nor that the prescribed \$10000 amount had been exceeded, he proceeded to seize them as “goods” explaining that they had not been reported as the *Customs Act* section 12 requires.

14. He threatened the plaintiff with arrest (an act of violence), stating that smuggling was an arrestable offence (answer 7 of Discovery of the Defendant Answers, TAB 20), in supporting his request that the plaintiff give him the gold and silver coins.

15. The officer’s behaviour was offensive and threatening, starting with his initial greeting “What do we have here?”, in a schoolyard bully tone, to his posturing, showing readiness to use his weapon, to yelling orders at the plaintiff (see Discovery of the Plaintiff, at answers 57, 65-72), in supporting his request that the plaintiff give him

the gold and silver coins.

16. The plaintiff feared for his safety and did not wish to be shot at or arrested, so he handed the coins to officer Debski.

17. In his narrative report officer Debski listed the criteria used by Canada Revenue Agency to identify financial instruments (see CRA policy P-192 in TAB 8, paras 3, 27-28) writing “Only those coins minted with metals at the required purity levels and issued by a government authority qualify” (TAB 18, page 2, para 4).

18. While the document that officer Debski quoted in his narrative report reads “... issued by a government authority and that may be used as currency will qualify”, the officer purposely left out the words “that may be used as currency” from his narrative, in order to support his assertion that these coins are “goods”.

19. He did not tell the plaintiff about the definition of financial instruments he was using, but proceeded to prepare the Seizure Receipt (TAB 2), in which he used the words “United States of America \$50; 1oz of .9999 Fine Gold Coin” and “United States of America Silver Dollar, 1oz. Fine Silver”, showing both that they were above issued by the United States Government, and that the purity of the metal was at the required purity levels, as listed by the Excise Tax Act s.123(1) definition of financial instruments (precious metals) (TAB 7).

20. While the purity of the silver coins is not shown on the coins due to space constraints, a lookup on the United States Mint would reveal the specifications of the coins, and its silver content of 99.9% (ie meeting the purity requirement).

21. The officer's false representation that the coins were subject to reporting under the Customs Act also helped induce the plaintiff into handing over the coins. The plaintiff was not entirely convinced that he should have reported them, however, the officer explanation that they had been “purchased” outside of Canada, therefore were “goods” did make some sense (officer's narrative report, TAB 18)

22. The seizure of the coins resulted in a loss of \$6427.89 by the plaintiff to the CBSA (see seizure report, TAB 2)

23. Even if the coins would be ultimately returned, the officer would still gain the amount of the terms of release on behalf of the CBSA (in this case the officer had set a 25% amount, or \$1606.97). This represents the benefit that the CBSA would have obtained as a result of the fraud, but the amount of \$6427.89 was the amount the plaintiff was deprived of.

24. Thus, officer Debski has committed fraud over \$5000 as described by the Criminal Code section 380.

CBSA's Bulletin is a recipe for money laundering

25. In his decision to seize the coins, officer Debski admitted in his narrative report (TAB 18, page 2, para 4) that he was aided by a secret internal bulletin circulated within the CBSA, the “Information Bulletin – Precious Metals – Bullion and Coin” (“the bulletin”, attachment in TAB 20).

26. The bulletin acknowledges in the first paragraph/abstract that gold and silver are “investment metals”.

27. While the bulletin is titled “Information Bulletin”, it contains no references to specific Acts of Parliament and sections to which it refers, so the information contained within it cannot be verified, as the context of the statements it makes cannot be ascertained.

28. Further, in the abstract (page 1, para 2), the bulletin states that a Cross-Border Currency or Monetary Instrument report is not required to be filed for precious metal importation.

29. The bulletin, at para 4 quotes the definition of “financial instruments (precious metals)” from the ETA s.123(1) (TAB 7), and for further clarity, at para 5 it quotes the Canada Revenue Agency policy P-192 (TAB 8, paras 28-30), which is part of CRA’s Memo 17.1, titled “Definition of ‘Financial Instrument’”. The sole goal of the CRA memo is to clarify the *ETA*’s provisions with respect to Financial Instruments.

30. Further in paras 7-10, the bulletin shows examples of Financial Instruments (precious metals), and lists various identifying criteria. It even depicts a Canadian \$50 gold coin (ie, Canadian currency per the *Currency Act*), a silver bullion bar, a Royal Canadian Mint gold ingot and a Credit Suisse platinum waver.

31. On page 2, para 4, the bulletin states “Coins are also to be treated as goods and not as currency”. (The word “not” is underlined in the bulletin).

32. Then it proceeds to explain that the coins have legal tender status, but the face value is “purely symbolic”, which is the opposite of what the *Currency Act*, s.7 (TAB 10) which states “A coin is current for the amount of its denomination in the currency of Canada”, ie, that the denomination is the value of the coin. (In Canada, the value of currency is set by decree, which is s.7 of the *Currency Act*).

33. In fact, the defendant understands that the “symbolic value” argument is not true, and he gives an example that is addressed at para Error: Reference source not found Error: Reference source not found.

34. Further on page 2, para 4, advises that financial instruments in gold or silver bar, ingot or wafer forms are also to be treated as goods, and not reported pursuant the *Cross-Border Currency or Monetary Instruments Regulation*. Once again, the bulletin emphasized the word “not”.

35. Further, on page 3, the bulletin outlines a method for generating “terms of release” revenue for the CBSA, by using the Travelers Entry Processing System (TEPS) software. The “penalty” is to be assessed of persons who refuse to declare financial instruments (precious metals) and currency as “goods”.

36. Together, the advice of treating financial instruments and gold/silver currency as “goods” and not reporting them pursuant the PCMLTFA constitute a money laundering facilitation method.

37. While the bulletin advises border officers that they override the TEPS software's determination of 13% GST/HST with a 0% value, it is clear that officers have the ability discretion to not do so. In the seizure that is the object of this action, officer Debski clearly did not override the TEPS software.

38. In many cases travellers are aware of the CBSA's treatment of financial instruments or are informed by the CBSA officers, resulting in a GST/HST payment of 13% to the CBSA. In the present action, if the plaintiff had declared the gold currency as “goods”, he would have been charged 13% (as evidenced by both the seizure report, TAB 2 and the separate online rating generated by the CBSA at the time of enforcement, TAB 3).

39. The tax payment can be made in cash at the CBSA's cashier counter. Given that this payment takes place before a traveller is required to report currency imported into Canada, and also since the tax payment is not in fact imported into Canada, the cash used for the tax payment can be “dirty”, ie proceeds of crime, that goes undetected, unreported to FINTRAC.

40. The CBSA operates a program for refunding duties and taxes on “non-commercial importations” (TAB 25), by which duties paid in error due to determination are refunded to travellers upon submission of documentation that the gold/silver imported should have been treated as tax free, as the bulletin shows. As a result, the CBSA refunds the tax paid in error by mailing to the traveller a Government of Canada cheque for the tax paid.

41. By using the tax refund mechanism, the CBSA offers a service by which it takes “dirty” cash as a tax payment, and later refunds it as a “clean” government cheque. This process of inserting the proceeds of crime into the banking system, is by definition, money laundering.

42. Therefore , not only does the CBSA facilitate money laundering by treating financial instruments (precious metals) as “not subject to the PCMLTFA”, but also launders money by taking dirty cash as “taxes”, and refunding it as “clean” government cheque.

43. The bulletin contains a footer on every page stating: “**PROTECTED - This document is the property of the CANADA BORDER SERVICES AGENCY. It is provided on the understanding that it will be used solely for official purposes by your agency and that it will not be further disseminated without the written permission of the CANADA BORDER SERVICES AGENCY”**

44. In light of the illegal instructions contained in the bulletin, the secrecy of the document is intended to shield the CBSA from becoming the target of legal action, and also from becoming the target of the “War on Terror”, “War on Drugs” and various similar “wars”.

45. Based on the annual reports of the Royal Canadian Mint, and by statistics from Industry Canada regarding the importation of gold coins under the tariff, it appears that the majority of 1oz gold coins produced by the Royal Canadian Mint are exported and accounted by the CBSA as goods, under the tariff 7118.90.00.10, as recommended by the bulletin. Presently this amounts to approx \$1.8 billion annually. The CBSA has refused to provide evidence to establish the amount of financial instruments treated as gold (discovery questions 1-4, TAB 20), and thus the statistics from the government sources are the best evidence.

Fraudulent use of “TEPS” software

46. The bulletin also instructs officers to use the TEPS software to obtain “terms of release” payments for currency and financial instruments which are exempt from provisions of the *Customs Act*.

47. The software, used by the CBSA at ports of entry is used to determine the duties and taxes owing on imported goods (Discovery of the Defendant, TAB 20, question 23).

48. On CBSA's own website (TAB 29, page 45), the software's purpose is stated to be: “*TEPS Assists the Border Service Officers in the assessment and collection of duties, taxes and other relevant data on travellers' importations.*”

49. In the defendant's answer to discovery, question 23, the defendant admits that the coins were determined to be “tax exempt”, but rather than also conclude that the TEPS software should have not been used at all, it concludes that the terms of release were incorrectly calculated.

50. As shown before, as the coins in question are not “goods”, but currency, they are not subject to taxation under *Excise Tax Act* s.50(1) (TAB 5), and therefore also not subject to the provisions of the *Customs Act*

stipulated by s.50(1)(b). Even if they were somehow considered “goods”, they would be exempt from s.50 by virtue of the exemption given in s.51 and Schedule III, Part XI, items (3) and (4). As such, there is no collection of duties or taxes that the Border Service Officers would need assistance with.

51. The TEPS software is little more than a glorified calculator, in that it looks up tax rates in tables, stores statistics of all goods imported nation wide. It is not however intended to determine exemptions, which are the responsibility of the officers. Ie, the officers should first determine if an item is a “good”, if it is “imported”, and if it is not exempted by *ETA* s.51, and only if these criteria are met, then the TEPS software should be used to assist with the calculation of duties and tax. For example, one would not enter “banknotes” into the software, under the tariff 4907.00.00.12 (Banknotes being legal tender, issued, see *Customs Tariff*, TAB 30), unless the traveller reporting them were someone like the Canadian Bank Note Company, as none of the HS4907 items are “goods” as per the intent of the Excise Tax Act (they are all things like money or financial instruments).

52. In fact, statistics from Industry Canada (TAB 31) show that the CBSA also classifies importation of banknotes and other money-like things under the tariff heading HS4907, however not enough detail is available to ascertain if the statistics refer to “issued” or “non-issued” such items. “Issued” banknotes would of course be financial instruments, while “non-issued”, such as banknotes printed by the Canadian Bank Note Company, and shipped to a foreign central bank for issuance would be “goods”.

53. The defendant's position is however that all coins or banknotes can be classified under some heading of the *Customs Tariff*, they can be treated as “goods”, and the TEPS can be used to extract “terms of release” payments, and even more seriously, such banknotes and coins would not be subject to the PCMLTFA.

54. Certainly the defendant makes the case that “collectible” or “non-circulation” money is “goods”, which is wrong.

Gold is Money

55. Excepting products made from gold, like jewellery, whenever Canada's legislation mentions “gold”, it is in a “money” context. In fact, there is no support to the CBSA's claim that precious metal in bar, ingot, wafer or coin form is “goods”.

56. While coins made of gold under the Royal Canadian Mint Act, are “currency”, respecting *Currency Act*

s.7-8, they are not are not “gold” as they cannot be melted or used in any other way than currency (such as to manufacture gold jewellery), as this is prohibited by s.11 of the *Currency Act*. In any case, they are not referred to as “gold”, but as “currency” in legislation.

57. The *Currency Act*, s.15 (TAB 10) provides that gold is a type of currency, similar to “a currency of a country other than Canada” or “a unit of account that is defined in terms of two or more countries” (making reference to the SDR, which is issued by the IMF as a “basket of currencies”), but as it is an universal currency, and not any one country's currency, it is listed separately.

58. s.15 of the *Currency Act* provides that the Governor in Council may make regulations that specifies the equivalent dollar value of those currencies or gold. This acknowledges the equivalency of currency with gold.

59. In fact, the purpose of s.15 is to enable Canada to unilaterally default on any treaty, convention, contract or agreement, by permitting the Governor in Council to declare a means of calculating the equivalent value in ways different than the universally accepted fair-market exchange rates. The Governor in Council has indeed used this facility to default on previous agreement, with the Canada Shipping Act Gold Franc Conversion Regulations, and the Carriage by Air Act Gold Franc Conversion Regulations, which set the conversion value of gold to approx \$12.81 per troy ounce of gold, while the fair-market value is presently about \$1640

60. s.15 does not say that the Governor in Council is to make such regulations for all of Canada's contracts, nor does it say anything about provincial or private contracts, which remain payable in gold if they were so entered into, in other words, gold remains a recognized international currency.

61. The Excise Tax Act s.123(1) (TAB 7) defines Financial instruments to be among other things, “precious metals”, defined as bars, ingots, coins or wafers of gold, silver or platinum, refined to minimum purity levels of at least 99.5% for gold and platinum, and 99.9% for silver. In other words, gold is money (a financial instrument).

62. Further, the *Currency Act*, in reference to the Exchange Fund Account, in the version pre-dating 2012-12-29, (TAB 11), section 17 specifically named gold as an asset that the Finance Minister may transact in for the purposes of the Exchange Fund Account, in addition to other currencies designated by the Minister. After 2012-12-29, the *Currency Act* was amended to replace section 17 with a section that does not explicitly state what assets the Exchange Fund Account may hold, nor how the Minister may transact, but instead leaving those decisions up to the Minister. (see the current section 17 in TAB 10). Thus, with respect to the Exchange Fund Account, gold is a currency.

63. In section 21 of the Currency Act, the Finance Minister is directed to table a report on the operation of the Exchange Fund Account on a yearly basis. That report shows gold as an International Reserve held in the Exchange Fund Account, along side US dollars, Euro, British pound sterling, Japanese yen, Special Drawing rights in cash, cash equivalent and securities forms (see TAB 32). Therefore, gold is a currency.

64. Pursuant sections 600 and 628 of the *Bank Act* (TAB 33), all deposit taking institutions operating in Canada must provide the Superintendent of the Financial Institution with a monthly consolidated balance sheet report, which is to comply with instructions given by the Superintendent (TAB 36). This required balance sheet, is to contain, in the Assets section, subsection "A1 Cash and Cash equivalents", a report of gold coin, gold and silver bullion, gold and silver certificates, precious metals, Bank of Canada notes on hand, etc. It is significant to notice that the first four items required to be included as Cash and Cash Equivalent Assets are gold and silver in several forms, ahead of bank notes, or other coins and completed deposits. This shows that not only that gold is a currency (cash and cash equivalent), but it is more important than other forms of assets (the list is shown not in alphabetical order, but in the order of importance).

65. In *Canada v. Nawaya*, BC Provincial Court case 179965 (TAB 26), the Crown (information by RCMP) argued that Canadian \$50 gold coins were currency. In this case, it is not in fact the metal, but the token aspect of the coin that makes them currency. This argument was successful.

66. In *Bombay Jewellers Ltd. v. The Queen*, 1998 CanLII 320 (TCC) (TAB 37, para 24), Margeson, J.T.C.C., the Crown argued that gold and silver bars, bearing a weight, purity and manufacturer mark are financial instruments. This argument was successful, though many arguments by both parties in this case were flawed, which lead to a decision in favour of the respondent. Nonetheless, the judge accepted the argument about markings defining a gold bar as financial instrument.

67. Banks deal exclusively in money-like products (cash, loans, savings, investments, insurance, etc). One of their investment offerings is gold, in various forms (though not jewellery, which is "goods"). They buy and sell gold in financial instrument form, as admitted in *Bombay Jewellers Ltd. v. The Queen*, and evidenced by the online websites of TD Canada Trust and Bank of Nova Scotia (TAB 38).

68. A person can purchase gold from one bank, then sell it to another, in effect moving money from one account to another. Banknotes can achieve the same feat, but in a more limited way. Eg, an account liquidated in Canada in the form of Canadian banknotes cannot be easily deposited with a bank in another country, like Egypt,

and vice versa. Not only is gold a cash-equivalent, it is a much better form of cash than banknotes.

69. In fact, in *Central 1 Credit Union v. UM Financial Inc.*, 2012 ONSC 889 (TAB 39), the defendant purchased \$1.867 million worth of gold bars from Bank of Nova Scotia with funds from the debtor's bank account. Then he hired a Joseph Adam to physically transport the gold to Egypt to pay "shariah consulting services" who had provided advice from 2004 to 2011. An invoice was even created by UM Financial in the amount of \$2,790,000 for the services. In this case, the defendant was clearly paying an invoice in gold, further evidencing gold's use as money. In relation to this case, the defendant's principals, were sought by the RCMP for arrest on fraud and money laundering charges (TAB 40). The case against one of the principals (*R. v. Kalair*, 2015 ONSC 6784, at TAB 41) is presently temporarily stayed pending arrangements for funding for council to represent Mr. Kalair.

Other CBSA practices that facilitate money laundering

70. According to the written discovery of the CBSA, the CBSA has always treated precious metal currency and financial instruments as goods, since it was created (TAB 20, answers 5, 6, 10, 12, 13).

71. In CBSA's Enforcement Manual, Chapter 2, part 2, dealing with Cross-Border Currency and Monetary Instruments Reporting, para 121 (TAB 22, re Disclosure by the CBSA), the following advice is given: "Officers may disclose information to FINTRAC if they have reasonable grounds to suspect that the information would be of assistance to FINTRAC in the detection, prevention, or deterrence of money laundering or terrorist financing".

72. This advice gives the officers the discretion to not make disclosure of currency and monetary instruments to FINTRAC, thus pre-empting FINTRAC.

73. The advice is not even reasonable, as FINTRAC's job is to analyze all financial information, even that which is legitimate, for example to detect changes in patterns.

74. In its capacity, the CBSA would not be able to tell which financial information is related to money laundering, as they are not tasked with keeping records on persons, or with understanding a person's social networks and affiliations.

75. The advice is tantamount to a patient only telling his doctor about the symptoms he thinks are relevant.

76. Pursuant the *Canada Border Service Agency Act*, s15.1 (TAB 34) and the *Financial Administration Act*,

s150 (TAB 35), the CBSA submits an annual report to the Minister of Public Safety and Emergency Preparedness, and the Minister lays it before each House of Parliament.

77. The CBSA annual report is in a form that clearly sets out information according to the major activities of the CBSA (per Financial Administration Act, s150(3)).

78. A sample report is included at TAB 23. In it, there is no mention of any activities relating to the *PCMLTFA*, even though the *PCMLTFA* is a core responsibility of the CBSA and a priority. The conclusion is that PCMLTFA enforcement is not a major activity of the CBSA.

79. In the annual reports, there is a table showing which Acts and Regulations the CBSA is responsible for enforcing and administering (TAB 23, page 4, “Organizational Context”, “Responsibilities”). The *PCMLTFA*, *PCMLTFR*, and *Cross-Border Currency and Monetary Instruments Reporting Regulations* are not mentioned.

80. Reporting on the Criminal Investigations Program (TAB 23, page 53, “Program 1.4: Criminal Investigations”), the CBSA states that the violations investigated “include criminal offences under the *Customs Act*, *Immigration and Refugee Protection Act*, various food/plant and animal legislation, and other border-related legislation”. Once again, there is no mention of money-laundering-related offences. Technically the statement may be construed to include money-laundering under “other border-related legislation”, which reveals that money-laundering crimes are at best an after-thought to the CBSA, and at worst, as the evidence shows, that the CBSA is in fact actively undermining the PCMLTFA, and they are facilitating money laundering themselves.

81. It can be said that therefore that the CBSA minimizes their responsibilities with respect to money laundering legislation, but based on the annual report, a more accurate conclusion would be that the CBSA entirely ignores money-laundering legislation.

Effects of CBSA's money laundering initiatives

82. The effect of CBSA's policy is made evident in FINTRAC's 2012 report “Money Laundering and Terrorist Financing Trends in FINTRAC Cases Disclosed Between 2007 and 2011” (TAB 28).

83. On page 26, the FINTRAC shows the movement of funds across Canada's border, and the central role of gold bullion in terrorist financing operation, but are not able to illustrate how this gold ends in the hands of terrorist organizations outside of Canada.

84. If the FINTRAC were informed of Financial instruments precious metals transiting Canada's borders,

there would be a directed arrow from the bullion symbol to the “Country 2” box, just like there are arrows from Canadian entities to “Country 2” depicting exportations of currency and Electronic Fund Transfers.

85. The CBSA's precious metals bulletin, and CBSA's policies surrounding precious metals are the cause of this blind spot, and of the inevitable inability of FINTRAC to understand money laundering better.

Nawaya Case

86. On October 6, 2009, a Mr. Khaled Nawaya, a Syrian citizen born in Saudi Arabia was seeking permanent residence in Canada, and entry at the Surrey, BC border crossing. He is a supporter of Hezbollah, an organization officially listed as a terrorist organization in Canada (see TAB 42, TAB 45).

87. He failed to declare approximately \$100,000 in Canadian and US banknotes pursuant PCMLTFA, and 812 Canada \$50 gold coins, and was charged by the RCMP in relation to this offense, successfully. (*R. v. Nawaya BCSC-179965, TAB 27*)

88. The RCMP considered his gold coins to be currency, as the Court agreed.

89. The CBSA originally suspected Mr. Nawaya of being a risk to national security, and detained him for more than 1 month for this reason, then attempted to clear him of the suspicion. However, logically, a negative could not be proven in this case, as the Hezbollah would naturally deny knowledge of an operative, and membership in Hezbollah cannot be reliably determined any other way than by asking Hezbollah itself. Indeed, the CBSA was not able to prove Mr. Nawaya's innocence, but assumed it, in spite of the evidence before them.

90. With regards to his gold, the CBSA treated it as “goods”, consistent with CBSA policy evidenced herein, and returned it to him on terms of release (TAB 43, TAB 44), claiming, as they did in the plaintiff's case, that he had failed to report “goods” pursuant the Customs Act s12, in spite of the RCMP recommending charges for the failed declaration under PCMLTFA, in consultation with the CBSA.

91. The RCMP proceeded with the charge themselves (TAB 27), but were not informed by the CBSA of the gold coins, but only of the banknotes Mr. Nawaya had. The RCMP found out about the coins at a later time, and amended their information (see the coins being added to the information in handwriting, and the amendment stamps of the court). Not only did CBSA try to pass the gold currency as “goods”, they withheld information from the RCMP.

92. Nawaya's own story about the gold coins changed during the investigation. At first he justified carrying

his money in gold coins as he wanted to avoid the US banking system because he did not trust them. Later he claimed he bought gold in a bid to avoid income tax in Canada, which he thought he would have to pay when immigrating to Canada. He also explained he didn't buy the gold himself, but wired money to his brother, who bought the coins.

93. In a curriculum vitae posted online, Nawaya claimed he manages his family's finances, and that he worked as an HR manager for a one-man California corporation named Bunko Enterprises. It's a company with no website, no online presence, and its address of record and principal are those of a Nawaya relative. In arabic, "bunko" translates to "A kind of swindling game or scheme, by means of cards or by a sham lottery. (v. t.) To swindle by a bunko game or scheme; to cheat or victimize in any similar way, as by a confidence game, passing a bad check, etc."

94. Since his 2009 immigration to Canada, Nawaya has moved back to Saudi Arabia.

95. If he did intend to move illicit money from the US to Saudi Arabia, he could not have flown directly from the US to Saudi Arabia, as the US treats gold as financial instruments, and would have investigated it. Nawaya himself admitted he had been the target of investigations by US Immigration authorities. However, driving to Canada (where he needed some type of visa to enter) and flying out to Saudi Arabia, knowing that the CBSA treats gold as "goods" was the obvious solution to taking the gold to Saudi Arabia without scrutiny. This is well educated individual, he holds an aeronautical engineering degree and a management degree, and certainly had the capacity to execute a relatively simple plan to move money from the US to Saudi Arabia.

96. When asked about his decision to mislead border guards he explained, in a false dichotomy, that "there is no reason to be suspicious, not everyone who comes from the Middle East is a bad person", which while partially true (there was plenty of reason for suspicions, but indeed not everyone from the Middle East is a "bad" person), said nothing about his own person.

97. Even though he was found with a Hezbollah ring (which he was not wearing at the time), he did not deny being a member of the Hezbollah, and even the media concluded that he can't be a Hezbollah operative, because the Hezbollah is a sophisticated organization, and surely he would not have a ring with him if he was a member. This in itself is a stunning display of false logic. If a person keeps their wedding band in their car, and admits it is theirs, instead of on their finger when walking into a bar (where he might be scrutinized), it does not mean he/she is single because they appear sophisticated. Men typically don't have or wear rings, unless the

rings carry some special significance to themselves.

98. All in all, Nawaya's story is fascinating but full of suspicious claims, in which the FINTRAC would have been uniquely qualified to untangle the source of the money and its purpose. After all, it's cases like Nawaya's that Parliament aimed to monitor when they created the PCMLTFA and FINTRAC. The FINTRAC has the tools and the mandate to "follow the money" in order to understand and help in the prosecution of complex crime.

99. The facts alleged above are not proven in this motion, but are merely highlighted to show that there were plenty of clues for FINTRAC to work with in an investigation. The CBSA kept the FINTRAC in the dark by treating Nawaya's coins as "goods". Certainly the CBSA did not act in the public interest by doing so.

100. It certainly appears that the CBSA has been willingly bungoed.

The UM Financial case

101. Good examples of expert money launderers are Mr Kalair, Mr Panchbaya and Mr Adam, of UM Financial.

102. According to facts in *Central 1 Credit Union v UM Financial Inc*, 2012 ONSC 889 , they worked together to commit fraud over \$5000 (\$1.867 million). They bought 32 gold bars from the Bank of Nova Scotia using funds from their UM financial account, and flew with them to Egypt to pay unnamed "sharia scholars", while their company, UM financial was in receivership proceedings, without notifying their creditors (see *Central 1 Credit Union v UM Financial Inc*, 2012 ONSC 889 at TAB 39). The RCMP laid fraud and money-laundering charges in this case (see TAB 40, TAB 41). At the time, the CBSA, pursuant their information bulletin on precious metals and policy that gold is "not currency" (such as they stated in *Sellathurai*), allowed the transfer of gold bars out of Canada without as much as a question. One of the facts in the case is Joseph Adam (also known as Gamal Hegazy) carrying the 32kg of gold bars in his luggage to Egypt on November 7, 2011 (TAB 39, para [6](i)). Carrying a carry-on suitcase full of gold bars no doubt triggered the airport security, who would no doubt have notified the CBSA. However, whether the CBSA was in fact notified or not, it is clear that their policy would have caused them to ignore the security report as irrelevant, on the basis that "gold bars are not currency", as in *Sellathurai* and the precious metals bulletin..

103. The level of expertise displayed by UM Financial is remarkable. First, they converted money into gold

bars, knowing the CBSA does not require their declaration on export (this policy is widely known on internet forums, even though the CBSA themselves keep it a secret). The UM principal, Mr. Kalair has set up a complex corporate structure with several interrelated entities (UM Financial Inc, UM Capital Inc, UM Financial Group Inc, UM Immigration Inc, UM Realty Services Inc, UM Real Estate Investment Inc, in Canada, UM Capital Markets Ltd in UK, etc). In preparation for moving gold out of Canada, he and Panchbaya created a separated corporate entity, MCC, to act as a creditor to UM Financial, generated an invoice for consulting services provided by MCC as justification for the gold move. MCC then hired a “financial manager” to handle the finances, and thus shield the MCC principal from exposure to financial matters, Panchbaya. The financial manager was Joseph Adam (this is Canadian name; his Egyptian name is Gamal Hegazy). Adam flew to Egypt via Paris on November 7, 2011 with the 32 gold bars in his luggage. This individual would be less likely to be suspected and searched on entry to Egypt or at the Paris airport, where he would get a connecting flight, owing to his Canadian passport and Canadian sounding name (at least to French and Egyptian ears), while both Kalair and Panchbaya as middle eastern names, would have been more likely to trigger suspicions.

104. In the case of Kalair and Panchbaya, CBSA's policy that gold is not money means that FINTRAC never found out about the transfer. At the time, FINTRAC would have known of UM Financial's purchase of almost \$2 million in gold from Bank of Nova Scotia, and of UM Financial's receivership with respect to Central 1 Credit Union, as the bank would have made reports of the high value cash transactions pursuant to the PCMLTFA. Also, had the FINTRAC had the opportunity of knowing about the 32 kg of gold leaving Canada, it is likely they would have asked the CBSA to investigate this money, which would have led to the discovery of the invoice prepared by UM Financial, and that some of the individuals that were beneficiaries were people like Zakir Naik, who is banned from entering Canada due to his support for Al Qaeda and terrorism (TAB 52), and others linked to terrorism.

105. It is clear that in the case of Mr. Kalair's money-laundering scheme, the CBSA played the role of a facilitator.

\$2 Coffee Argument

106. On August 30, 2016, the defendant filed a motion to strike the Statement of Claim in its entirety, without

leave to amend. He was unsuccessful.

107. One of the arguments the defendant proposed supporting his motion was the same as he makes in this motion at para 35 of his Written Representations, namely that section 8 of the *Currency Act* provides a good example that collector coins cannot be considered as currency. The defendant made this argument previously at para 29 of the Written Representations in his motion to strike the Statement of Claim.

108. In her decision on that motion, Madam Prothonotary Martha Milczynski with reference to this argument, noted that the defendant's written representations on that motion go to the merits of the appeal.

109. However, having been told that the argument does not support his case, the defendant insists on making it again, but this time he additionally provides an example on how section 8 of the *Currency Act* would operate in a typical coffee-shop transaction (paras 32 and 36 of his Written Representations on this motion).

110. Section 8(2.1) of the *Currency Act*, which the defendant quoted in his Written Representations, states that "In the case of coins of a denomination greater than ten dollars, a payment referred to in section (1) may consist of no more than one coin, and the payment is a legal tender for no more than the value of a single coin of that denomination". In other words, not only is a payment permitted using a \$50 coin for example, but the payment is a legal tender for "no more than the value of a single coin of that denomination", ie, no more than \$50.

111. At para 36, in his coffee shop example, the defendant demonstrates (a) he understands that gold coins would be accepted as legal tender in every day transactions, (b) that the value of gold coins when used as legal tender is the denominated value and (c) that he understands the reasons why such coins may circulate, but do not.

112. The defendant contemplates a transaction in a "local coffee shop" using a two dollar coin, so I will assume he talks about Canadian currency spent in a Canadian establishment, and that the coffee shop is a diner setting, where customers sit down at a table, order their coffee, and get a bill at the end of their consumption.

113. The two dollar coin the defendant mentions was first issued by the Royal Canadian Mint in 1993, pursuing Proclamation Authorizing the Issue and Prescribing the Composition, Dimensions and Designs of Certain Precious Metal Coins SOR/93-106 published in Canada Gazette on 25th of February 1993 (see TAB 46).

114. If purchased from a coin dealer, one would expect to pay at least \$117 for such a \$2 coin, owing in part to the fact that the Mint no longer mints this denomination.

115. This \$2 coin is issued according to the *Currency Act*, and is currency of Canada.
116. A core proficiency of a cashier working in commerce would be to understand currency, and specifically sections 7 and 8 of the *Currency Act*, which explain what a proper payment (legal tender) is.
117. When presented with a payment of a two-dollar gold coin, the cashier would take notice that the coin is legal tender according to *Currency Act* section 8, that the coin are listed in the *Royal Canadian Mint Act*, as required in section 7 of the *Currency Act*, and therefore the only remaining concern is if it is genuine. Genuineness of coins is not typically questioned in Canada, given the small risk of a large loss, given the relatively small denominations of coins. If these 3 criteria are met, the payment can be accepted, and there is no doubt it would be accepted.
118. The diner transaction is an implicit agreement, where the service is provided first, and it is billed later, such that the bill constitutes a debt in consideration for services rendered. In this case, the coffee shop may accept any form of payment they wish (credit, debit, cheque), but must also accept legal tender.
119. Legal tender by definition cannot be refused where it settles a debt; the debt is literally a legal form of payment. Should the matter of the payment come before a Court, it would be undoubtedly found that a legal tender settles the implicit agreement and the arising debt. This differs from the case where a coffee vendor declines to supply coffee in exchange for currency he doesn't like (such as \$100 or \$1000 bills, for instance). In the coffee vendor case, there is no agreement that needs to be settled, and certainly a Court would not force the vendor to enter such an agreement, being how there is no statute enabling such a judgement.
120. As the payment for the billed consumption is made with one two-dollar coin, it is a legal tender for two dollars.
121. Assuming the cup of coffee carries a \$2 price, the cashier would take the two-dollar coin, provide a receipt, and the transaction would be complete, the debt having been settled, and the agreement fulfilled.
122. The defendant says that "No one in his or her right mind would use a gold coin with a two dollar face value to purchase a cup of coffee at the local coffee shop".
123. This position recognizes that purchasing a gold coin from a coin dealer for \$117 only to use it to buy coffee for its face value is certainly possible. The implied craziness comes from the fact that the \$2 gold coin would only purchase \$2 worth of coffee. Indeed, if the cashier were to treat the \$2 coin as a \$117 coin, and give the customer \$115 in change, there would be nothing crazy about the transaction at all. In this case, gold

currency would circulate freely. The fact it gold currency does not circulate in practice owes to the fact that it is only recognized for its face value. Per *Currency Act* section 8, merchants are not required to recognize any value other than the denominated value of coins and banknotes as legal tender, regardless of collector value.

124. As shown, the defendant understands that gold coins are currency, they may be circulated freely, and are worth exactly as much as their face value shows, at least when used as legal tender.

125. The “non-circulation” distinction in the Royal Canadian Mint Act has two purposes: (a) to allow the mint to specify the composition and characteristics (dimensions, weight, metal), while for “circulation” coins, the Governor in Council decides the characteristics other than those specified in the Act, and (b) to provide the manufacturers of coin-operated machines with composition and weight specifications to allow them to design denomination-discriminating machines. As the “non-circulation” coins are not “intended to circulate”, but are permitted to do so, the act implies that coin-operated machines need not be designed to be compatible with “non-circulation” coins.

Circulation, collector status not affecting currency status

126. Currency is generally one of most collected articles world wide. People have an innate fascination with coins.

127. In Canada, the Royal Canadian Mint, and the Minister of Finance, regularly issue collectible coins into circulation, one example being the recent 2012 colour issue of the “war of 1812” quarters, which was ordered by the Governor in Council and registered in Canada Gazette SOR/2012-126 on June 15, 2012 (see TAB 47, section (c)(iv))

128. The rationale of the order is stated at section 6 of the Order, as such: “Because these coins are available at face value and circulate widely, public demand is high with many coins being collected and taken out of circulation. Commemorative circulation coin programs create important benefits by contributing to the overall success of the event being celebrated as well as generating additional revenue for the Government.”

129. It is clear from the rationale, that even though the “war of 1812” coins are issued as circulation coins (ie, per Part 2 of the Schedule in the Royal Canadian Mint Act), they are expected to be “collected” and “taken out of circulation”. Furthermore, the purpose of this program is to “generate additional revenue for the Government”. As collectible coins are purchased and never used as currency, this is an easy way for the Government to literally

“print” money. Obviously, the intent of the Minister of Finance is that these “circulation” coins are both “collector coins” and “not circulating”.

130. An example of an eBay auction of eight “war of 1812” circulated quarters is at TAB 48. These are coins found in someone's every-day change, and sold as a set for \$5.50 plus shipping when their total face value is \$2. They clearly are collectible, with a collector value higher than the face value, and removed from circulation. However, they are still currency, and can be circulated again if the buyer so desires.

131. In every handful of Canadian change there are lots of coins that are collectible, and could be sold to a coin shop for much more than their face value, yet most people just use them as legal tender for face value. The defendant would argue that these people are not in their “right mind”, but it is how coin currency works.

Value of gold and silver currency

132. Neither the *Currency Act*, nor the *Royal Canadian Mint Act* specify another way of valuing coins issued under their authority than the face value.

133. Indeed in Canada and other countries (like the U.S., where the coins in this action were issued), the value of currency is set by decree (*Currency Act* section 8 in Canada, U.S. Code Title 31 section 5112(a)(11), 5112(e), 5112(h), and 5112(q) see TAB 13).

134. Furthermore, both in Canada and the US, pursuant *Currency Act* s. 11 and USC Title 31 s5111(d), melting of coins is prohibited, and the penalty is a fine of up to \$250 and/or twelve months imprisonment (in Canada). In the US the penalty for melting coins is up to \$10000 and/or up to 5 years imprisonment.

135. Due to the prohibition on melting coins, including gold coins, one cannot legally “unlock” the metal in a gold coin and use it as the commodity. Once this metal is tokenized into a coin, it is the only way it may be used, according to the *Currency Act* and USC Title 31.

US Code does not say non-circulation

136. While the defendant claims the US coins he seized are not intended for circulation, he provides no evidence to support his claim.

137. The statute enabling the issuance of these coins mentions they are current, and legal tender, and makes no mention of circulation. Furthermore, they are listed in the same list as all the other US coins such as quarters, dimes, etc, implying they share the same circulation status (*US Code Title 31 s.5112,TAB 13*)

138. In any case, as shown numerous times, there is no statutory support to the theory that some coins issued by the US or Canadian governments may not circulate, or that even though they are issued respecting currency statutes, they are not currency.

CBSA facilitating currency counterfeiting

139. CBSA's policy of treating currency as goods enables and facilitates currency counterfeiting by removing the deterrent of the Criminal Code s.450 and s.451 against persons who import or purchase counterfeit gold coins.

140. The CBSA Enforcement Manual Part 2 Chapter 2 (Cross-Border Currency and Monetary Instruments reporting), para 128 (TAB 22), advises that "Counterfeit currency and monetary instruments are not considered legal tender and are therefore outside of the realm of the PCMLTFA. They should be processed as described in the Customs R-Memorandum 17-1-5".

141. Memo 17-1-5 is titled "Registration, Accounting and Payment for Commercial Goods" (TAB 24)

142. The Enforcement manual therefore instructs officers to allow importation of counterfeit currency and treat it as "commercial goods", rather than Criminal Code s 450-451 offences.

143. There is a thriving industry in counterfeiting gold coins, thanks to the relative ease in manufacturing them. A set of fifty, \$50 Gold Maple Leafs fakes can be bought on aliexpress.com for only \$185 (ie, \$3.71 each), with free 7-day shipping from China (see TAB 26). While these coins are typically advertised as "replicas"; they are outstanding copies of current issue Royal Canadian Mint coins. They lack any marking identifying them as "replicas", and duplicate even the mint mark, which is a security feature of genuine coins. There is no doubt that the only purpose to purchasing a set of fifty such coins is to use them as if they were genuine Mint coins.

144. The ad listed shown in TAB 26 is one of dozens on aliexpress, and it represents one of the cheaper coins, made of brass with gold plating. These coins can be detected as fake by a knowledgeable potential purchaser, however there are also ads for much more accurate counterfeits, with tungsten core and gold plating, which require specialized equipment to detect as counterfeits, owing to perfect reproduction of all physical

specifications of a genuine gold coin. These kinds of coin sell for about \$155, but can easily pass scrutiny of even knowledgeable collectors. There is no doubt that the only use of such a coin is to be used as a genuine coin.

145. Also available from China are counterfeits of most if not all gold coins of all countries that issue gold currency.

146. The ad at TAB 26, even shows a Canadian purchaser in the transaction history. Without CBSA's treatment of gold coins as currency, the buyer, identified as "P***e C." from Canada was able to purchase 50 coins from the particular seller, and have them shipped to Canada, which in itself would be a counterfeit possession offence according to the Criminal Code s.450. However, thanks to the CBSA, Mr. C. Will be able to pass them on to unsuspecting victims, which would be a violation of the Criminal Code s. 451 (Uttering coin).

147. The correct behaviour of the CBSA would be to treat gold coins as currency, and report importations of fakes to the RCMP. The RCMP has a longstanding tradition of fighting currency counterfeiting (see TAB 16, TAB 17), while the CBSA has never since it was created, prosecuted or provided information regarding importation or exportation of counterfeit gold currency.

148. In fact, if the enforcement manual instructions about counterfeit currency is applied, the CBSA also treats importation of counterfeit banknotes as an importation of "commercial goods".

Amateur, Expert and Professional levels of money-laundering

149. In the money-laundering trade, there are amateurs, experts and professionals.

150. An amateur is someone of little or no sophistication, such as Mr Amasu, who on April 2, 2009 tried to smuggle approx \$14000 as a stack of banknotes while boarding a flight to Ethiopia (see *Admasu v. Canada* 2012 FC 451, TAB 49). His attempt was not even concealed, and relied on the hope that he would not be found. The CBSA seized his money, without any evidence of money-laundering, merely on the technicality that he did not report it pursuant PCMLTFA section 12. An outsider looking at this case would conclude that someone who is not even able to pay his credit cards, is taking money to support family back to his native country; there is no reason to suspect money-laundering here.

151. Ironically, in the Admasu case, the Minister of Public Safety relied on *Sellathurai v Canada (Minister of Public Safety and Emergency Preparedness)*, 2008 FCA 255, which is an appeal on *Sellathurai v. Canada*

(*Public Safety and Emergency Preparedness*), 2007 FC 208 (see both at TAB 50). In this Federal Court of Appeal case, based on the facts at para 3, Mr. Sellathurai was carrying two gold bars worth \$20000 according to him in his carry-on, and he provided receipts for the bars. The CBSA left the gold bars with the appellant “as they are not considered to be currency for the purposes of the [*Proceeds of Crime (Money Laundering) and Terrorist Financing] Act*”. This explanation is a false dichotomy. While gold bars are not strictly currency as defined by the *Currency Act*, they are cash-equivalents, and financial instruments as shown above at para 55., and certainly subject to reporting requirements of the PCMLTFA. Even though the CBSA treated and prosecuted Mr. Sellathurai as a money-launderer, they allowed a money-launderer to keep some of his money, the gold bars. Mr. Sellathurai is an amateur; he relied on the hope he would not be found. With their enforcement action the CBSA effectively told Mr. Sellathurai “Next time, change all your money into gold bars, and you’re free to go as you please”.

152. In any case, in the Sellathurai case, just as in the Amasu case, the CBSA has not shown any evidence of the money in question being proceeds of crime, but only that the reporting requirement was contravened.

153. The conclusion is that the CBSA does catch some amateurs, but its doubtful that they are money-launderers.

154. Mr Nawaya, whose case was briefly described above at para 86. is also an amateur. His plan was more refined than Mr. Amasu, but, he also heavily relied on luck, hoping his \$100,000 in banknotes would not be discovered at the border crossing. Had he converted all his money to gold, he would have avoided all the trouble, there would not have been a criminal charge, no criminal lawyer defending costs, and would have avoided all the media attention.

155. There is a slightly more sofisticated class of criminal, the expert. Such an example was described above at para 101., in the case of UM Financial. In this case, the CBSA's policy stated in the Precious Metals Bulletin clearly facilitated the UM Financial money laundering.

156. The people connected with UM Financial are experts at money laundering, evidenced by their preparation, complex corporate structures, but ultimately also rely on luck. They transferred \$1.867 million in one trip, on the hope that the French and Egyptian authorities would not catch them, though they prepared as well as they could. If the CBSA had not held the position they do with respect to gold, this transfer could have been prevented, and the government's case in the criminal trial against Kalair and Panchbaya would have benefitted

from the evidence of catching the money-laundering in the act.

157. Moving up on the scale of sophistication are professional money launders, who plan their activities much more diligently than experts, and are unlikely to be caught, even if the CBSA were not helping them. One example is that of the unnamed entity who on August 26, 2010 requested a ruling from Joanne Lepage, a CBSA senior program adviser (TAB 53). In their request, the unnamed entity employed two intermediaries, Livingston Consulting, a Canadian customs broker, and Treasure Island Coins, a US gold dealer. The entity wanted to arrange for capital to be moved from US to Canada in the form of gold coins and bars. Their only concern was with respect to Cross Border Currency and Monetary Instruments Reporting Regulation. They wanted a written assurance that the financial instruments they sought to import would not be subject to the Regulations, which Ms. Lepage provided on August 31st, 2010. The level of sophistication greatly exceeds that of the experts. These professionals were seeking to obtain a limitation of criminal liability from the CBSA. If they are ever caught (by the RCMP, for instance), they can use the CBSA letter in case of Criminal money laundering charges. In case they could not obtain the assurances, they would of course find another way, but in no way relied on luck. The CBSA cannot prevent this level of money-laundering, but this does not mean it should assist it. This is where the FINTRAC would be able to get a better insight into such operations, by “following the money”.

Security Context

158. From a security perspective, the CBSA's role is to lessen security risks to Canada. To that end, it is not enough to apply the laws of Canada, even if they did. They would need a security mindset, ie, recognize the purpose of actions taken by travellers, in order to asses risks.

159. For instance, if a foreign terrorist organization accepted gold as funding, the CBSA should recognize this and inform FINTRAC or other intelligence organizations when they see gold passing by.

160. For example, suppose that a terrorist organization accepted Maple Syrup as consideration. Even though they think of Maple Syrup as an asset, Canada does not.

161. The plaintiff does not know of any maple syrup terrorists, but the point is that it's how an asset is used that makes it a resource of terrorism, and not how it is classified in Canadian statute.

162. To recognize traffic patterns that betray criminal or terrorist activities, the CBSA would need to have a security mindset. Even if they treated gold correctly (as financial instruments), the CBSA's culture and mindset is

not compatible with that of a security organization.

163. While the defendant is hoping for a mandamus order as remedy, no mandamus order can instill the security discipline that Parliament envisioned when they created the *Canada Border Services Agency Act*.

Cui Bono?

164. In trying to work out what occurred, or better, why what occurred did occur, one should determine who benefits. The suggestion is that the persons who benefited set up events to secure those benefits. *Cui bono – who benefits? (Second Philippic, XIV)*

165. In the CBSA Precious Metals bulletin (TAB 20), the “terms of release” imposed by the CBSA benefit the CBSA, as they are additional revenue.

166. The bulletin is a secret document, as shown in its header, meaning only those privy to it would be able to avoid the “terms of release”. Specifically a well informed person would be assured by provisions of the Currency Act, Excise Act and the PCMLTFA that the correct way to import or export gold and silver in bar, ingot, wafer or coin form is to report it pursuant PCMLTFA if the value exceeds the prescribed amount of \$10,000, and that such precious metals are exempt from all requirements of the Customs Act. Persons privy to the bulletin are those who would benefit by avoiding the penalty and other incidentals such as being flagged as a smuggler, or having to fight the CBSA in Federal Court, with an action such as this. Those persons are employees of the CBSA, their families and associates.

167. The exemption from reporting pursuant PCMLTFA benefits those who need to move more than \$10,000 across the border, and keep the transfer secret, ie, criminals of various denominations.

168. The public does not benefit from the increased criminal activity associated with money-laundering.

169. The government does benefit from increased criminal activity, as it is a justification for increased budgets for law enforcement.

170. The Minister of Public Safety and Emergency Preparedness benefits politically as he can use the increased occurrence of crime as a justification for how important his own job is.

Why?

171. In deciding what the appropriate remedy is, it is useful to consider why does the CBSA make their case the way they do (treating “collectibles” as goods).
172. The simplest and most probable reasons are: to avoid being held accountable for their past activities, and to continue this activity in an expanded manner.
173. Currency becomes collectible all the time. For instance, the \$1000 Bank of Canada banknote was retired from circulation on May 12, 2000, at the advice of the Solicitor General and the RCMP, as it was often used for money laundering and organized crime (see CBC article on the retirement, TAB 16). Even though it is retired, the banknotes that are still in public hands remain legal tender, and almost \$1Billion worth of these banknotes remain in circulation. A National Post article from 2012 (see TAB 17) refers to the Charbonneau Commission Quebec corruption probe where a witness spoke of a safe over-stuffed with cash, including \$1000 notes, inside a political office, and generally why the \$1000 is desirable for organized crime, and how it is used.
174. The \$1000 appears in eBay auctions all the time, at prices around \$1300 each (so more valuable than their face value), and they are without a doubt, truly collectible.
175. In advancing the argument that currency that is “collectible” is goods, and that once the true value of a currency exceeds its intrinsic value, and therefore does not need to be reported pursuant the PCMLTFA, the CBSA is looking to expand its money laundering activities from gold currency also to banknotes that they deem “collectible”, such as the \$1000 banknote.
176. Also in recent years, Bank of Canada has switched from cotton-paper banknotes to polymer notes, while removing the cotton-paper notes as quickly as they can. This makes the old, paper notes collectible and more rare each day, but in law they are still currency, and will be as long as the Canadian Dollar is Canada's national currency. The Currency Act has no provisions for actively obsoleting old banknote designs; it is up to the Bank of Canada and the chartered banks to swap new notes for the old as best they can. The main reason for cotton-paper being actively removed from circulation and replaced with the polymer notes is that the cotton version is counterfeited in Canada at rates around 500PPM (500 fakes in 1 million circulation notes), while in the G20 nation, 50PPM is the maximum counterfeit rate considered acceptable. Why would the CBSA want to treat the old cotton-paper banknotes as “goods”?

177. Another ramification of treating gold currency as “goods” is that counterfeit currency can freely enter Canada without a chance of Criminal Code penalties. Counterfeiting currency is a serious crime, but counterfeiting “goods” is not. Why would the CBSA take steps to make counterfeit currency easier to obtain and use in Canada?

178. Is there another, more likely benefit to Canada to the CBSA treating “collectible” currency as “goods”, and exempting it from the PCMLTFA reporting regime? The plaintiff argues that there is not.

CBSA is a criminal organization facilitating money laundering.

179. According to the Criminal Code code s.467.1 (TAB 14), the CBSA is a criminal organization as it fulfills the following criteria in the definition:

180. It is a group composed of three or more persons in Canada (Christopher Debski, Ann Kendall, Martine Gagnon, Jeffrey Strickland, Joanne Lepage, and the rest of the employees of the CBSA working in any law-enforcement or program administration function) (criteria 467.1(1)(a))

181. Has as one of its main purposes and activities to enforce and administer the *Customs Act* and *Excise Act*, pursuant *Canada Border Services Agency Act* s2(a) and s5(1), and enforces these acts in a way that enables money laundering by treating gold and silver in bar, ingot, wafer and coin as “goods”, and not reporting or allowing them to be reported as financial or monetary instruments under *Cross-Border Currency and Monetary Instruments Reporting Regulations* or the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act*, and is thus facilitating money laundering.

182. Money Laundering is a “serious offence” as defined by CC 467.1, being an indictable offence punishable by imprisonment for a term not exceeding ten years, according to CC 462.31.

183. Facilitation of an offence does not require knowledge of a particular offence the commission of which is facilitated, or that an offence actually be committed (criterion 467.1(2))

Money Laundering claims against Christopher Debski

184. As shown above at para 9., Mr. Debski knew the coins he treated as “goods” were in fact currency, and therefore knew he was enhancing the ability of the CBSA to facilitate an the indictable offence of money laundering under the Criminal Code (criterion 467.11).

185. Mr Debski participated in the activities of the CBSA by wearing a uniform, insignia and ID badge, which are associated with the CBSA. (criterion 467.11(3)(a))
186. Mr. Debski associates daily with other officers of the CBSA who also constitute the criminal organization, as part of his employment in the CBSA. (criterion 467.11(3)(b))
187. Mr. Debski receives a salary from the CBSA organization, and other employment benefits, training and career advancement opportunities.
188. Mr. Debski repeatedly uses the Precious Metal Bulletin as written instructions in his daily duties.

Claims against Ann Kendall

189. On October 23, 2014, the plaintiff submitted to the CBSA an Electronic Enforcement Appeal Form (Appeal Form, TAB 55) in relation to the October 21, 2014 seizure of four US \$50 gold coins and twenty US \$1 silver coins (seizure synopsis, TAB 54).
190. In the appeal, the plaintiff provided as basis the facts that the coins are US legal tender, and that they are classified as Financial Instruments by the Canada Revenue Agency, per CRA's GST/HST Memorandum 17.1(CRA memo, TAB 56), and that the coins are currency and exempted from tax when imported.
191. The CBSA Recourse Directorate, whose responsibility is to handle such appeals, assigned Ms. Ann Kendall as adjudicator to the case acting for the President of the CBSA, who sent the plaintiff an acknowledgement letter on November 3, 2014 (letter, TAB 57)
192. In her letter, Ms. Kendall pledged an impartial review of the seizure decision, and a transparent and timely redress.
193. In the letter, Ms. Kendall stated her finding that the coins are classified as "goods", on the basis of being mentioned in the Customs Tariff, and used the term "collectable coins", which does not appear in the Customs Tariff. This is incorrect, as the Customs Tariff is not a taxing statute, it does not enable the *Customs Act*. The *Excise Tax Act*, s50(1)(b) enables the *Customs Act*.
194. Further, she claimed that she confirmed that under the Proceeds of Crime (Money Laundering) and Terrorist Financing Act, "currency includes all foreign and domestic bank notes and "circulation coins" (emphasis is Ms. Kendall's, see letter TAB 57, page 2, para 6). This is a misrepresentation of the PCMLTFA, as it does not contain a definition of currency, nor the phrase "circulation coins".

195. Further, she attempted the explanation that the silver and gold coins are considered as “uncirculated”, and therefore not currency. This is also false, and illogical. Uncirculated means “minted”, but not yet “issued” in a technical sense. In a collector’s view, there are no non-issued coins, as mints do not sell to the public coins that have been minted, but not “issued” by the appropriate government entity. Collectors use the term “uncirculated” to mean “pristine”, unscratched.

196. In her letter, Ms. Kendall provided no statutory reference for her conclusion that “uncirculated coins” are not currency, or that they are a good, and taxable, or subject to the *Customs Act*.

197. On November 10, 2014, the plaintiff sent a letter to the Recourse Directorate (letter , in response to Ms. Kendall’s November 3 letter.

198. In his letter, the plaintiff offered further documentation showing the coins are not subject to the Customs Act, and requested statutory references on which Ms. Kendall relied on in reaching her conclusion. The documentation provided included a sworn affidavit by the Assistant Deputy Minister of Finance, stating the status of Canadian gold coins as circulation currency (Minister of Finance affidavit, TAB 59), and a copy of US Public Law 109-145 (“Presidential \$1 Coin Act of 2005”, TAB 60, section 201), which adds the American Gold Buffalo coins (the gold coins seized) to the list of current legal tender coins. Also provided was an excerpt of US Code Title 31, section 5112(e), that says that US Silver Eagles (the silver coins seized), are current, legal tender, and also numismatic simultaneously (US Code Title 31, section 5112, TAB 13).

199. Further, the plaintiff explained that the collectibility of currency does not affect its currency status, even for “non-circulation” currency.

200. The plaintiff also informed Ms. Kendall that misclassification of currency as goods is effectively exempting currency traffic from the PCMLTFA, and that it is an arbitrary exemption, which creates a hazard to the national security of Canada. (TAB 58, page 3, para 1). At para 2, the plaintiff pointed out that the “gold is goods” narrative encourages terrorists and other criminals to convert their currency to gold before coming to Canada. This warned Ms. Kendall that her position facilitates money laundering and terrorist financing.

201. On November 19, 2014, Ms. Kendall was requested advice and was advised by her colleagues that gold is goods. In her request, Ms. Kendall wanted confirmation that the CRA Memo 17.1 regarding the definition of financial instruments is obsoleted by the “new PCMLTFA legislation”, thus seeking a way to justify her position. (TAB 61). Part of the advice provided to her was Joanne Lepage’s assurances to Treasure Island Coins that their

importation of capital in the form of gold is not subject to PCMLTFA, dated August 31, 2010. Part of the advice was also Jeffrey Strickland's endorsement of the assurance letter, and he even stated "although I don't know where the reference is from, it appears the Agency's position with respect to the definition of currency is that it includes "includes all foreign and domestic bank notes and circulation coins""

202. In a follow-up letter dated December 11, 2014 (see TAB 62), Ms Kendall admitted that her November 3 statement that "currency" is defined in the PCMLTFA was a fabrication (TAB 62, para 5). Ms. Kendall misrepresented the PCMLTFA, in support of the seizure and demand for "terms of release". Additionally, she attempted a new explanation for the seizure, stating "gold coins are considered commodities". She also stated that the documentation provided to her, GST/HST Memo 17.1, sworn affidavit by the Minister of Finance, and the US Law regarding the gold and silver coins "were given consideration, but do not provide relief". However, the fact that Ms. Kendall offered no rebuttal of any of the four documents shows that no consideration was given to them, ie, they were promptly ignored.

203. Up to this point, Ms. Kendall as an adjudicator, failed in her mandate to impartially adjudicate. She took the opinions of her coworkers, and her own, even though she was able to offer no statutory evidence, over the statutory evidence provided by the plaintiff.

204. In a telephone conversation dated December 17, 2014, the plaintiff warned Ms. Kendall that her conclusions thus far constitute aiding and abetting terrorism, and if she were to continue, she would be subject of legal action. (see Ms Kendall's notes, TAB 63)

205. On January 21, 2015, the plaintiff sent a letter to the President of the CBSA, Mr. Luc Portelance, informing him of Ms. Kendall's misrepresentation of the PCMLTFA, and that she was committing fraud under the Criminal Code s380 (letter to President, TAB 65). Evidence was provided in the letter, and the remedy the plaintiff sought was that the President reassign the case to a law-abiding adjudicator.

206. While the President of the CBSA never acknowledged the charges to the plaintiff, he did reassign the case to Martine Gagnon effective February 9, 2015.

207. In a letter dated January 21, 2015, to the Recourse Directorate, the plaintiff offered further arguments based on the *Currency Act* and *US Title 31* in support of his position (TAB 65), showing how coins issued under those act may not be melted or used any way other than as currency, and also explaining, and emphasising, how the *Excise Tax Act* defines the coins in question as financial instruments. Additionally, the plaintiff pointed out that

the Customs Tariff is not a taxing statute, evidenced by a warning stated in the Customs Tariff itself, and instead, the authority of the Customs Act is given by the Excise Tax Act. The plaintiff reiterated the request for statutory references backing up the position of the CBSA.

208. On January 29, 2015, John Dancause, a senior recourse program advisor with the CBSA discussed the issue of the seizure with Jeffrey Strickland, who was the Minister's Delegate in this case. He summarized the discussion in a letter to Ann Kendall, informing her of the clear statutory evidence that the coins are currency, and advising the seizure be reversed (TAB 66).

209. Ms. Kendall omitted to note John Dancause's letter in the case synopsis (TAB 71), and took no further action in response to this letter, though she acknowledged the plaintiff's January 21 letter on February 3rd, 2015, in writing.

210. Ms. Kendall therefore knew that the coins are not goods, and misrepresented the PCMLFA in order to support the seizure of \$6427.89 worth of property from the plaintiff. The \$6427.89 represents the cost the plaintiff paid, and therefore the replacement value of the coin. For every purpose, the plaintiff was deprived of this amount of savings. While the face value of the coins is only \$220 USD when used as legal tender, the plaintiff did not intend to use it as such.

211. Ms. Kendall also acted maliciously, in a high handed fashion, ignoring all the evidence the plaintiff submitted in support of his appeal, and relied instead on her own opinions of and those of colleagues, while ignoring also Mr. Dancause's statutory evidence, and his advice, which did not accord with her goals.

212. Therefore, Ms. Kendall committed fraud over \$5000 consistent with the Criminal Act s.380, and did so in order to facilitate money laundering.

Claims against Martine Gagnon

213. On March 9, 2015, Ms. Martine Gagnon, a Senior Appeals Officer with the CBSA Recourse directorate, wrote a letter to the plaintiff (in an adjudicator capacity, picking up the case where Ms. Kendall left off).

214. In her letter, Ms. Gagnon provided a ruling that the CBSA Legal Services Unit furnished.

215. The ruling quoted the definition of "cash" from the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act*:

216. “cash” means coins referred to in section 7 of the *Currency Act*, notes issued by the Bank of Canada pursuant to the *Bank of Canada Act* that are intended for circulation in Canada or coins or bank notes of countries other than Canada. (especes)
217. Further, the ruling concluded that “foreign coins intended for circulation would be considered as currency”, and “foreign coins that are not intended for circulation are to be considered goods”.
218. On the basis of the ruling of the Legal Services Unit, Ms Gagnon concluded that the seizure stands.
219. The definition of “cash”, while quoted correctly, was read incorrectly. The phrase “intended for circulation in Canada” applies exclusively to “notes issued by the Bank of Canada”, and not to coins or bank notes of other countries. The origin of this phrase is the Bank of Canada Act s.2 definition of “notes”, and its purpose is explained in section 25(6), where Notes of the Bank are neither promissory notes nor bills of exchange, ie, to make the distinction between bank notes that are intended for circulation, and other notes of the bank such as promissory notes or bills of exchange, which are not intended for circulation, and therefore not “cash”.
220. In her conclusion, Ms. Gagnon misrepresented the PMLFTR and PCMLTFA. The regulation and the Act do not say that any coins are excluded from the definition of “cash”, as Ms. Gagnon claimed.
221. On March 17, 2015, the plaintiff responded to Ms Gagnon (TAB 68) explaining as above that the phrase “intended for circulation in Canada” does not apply to foreign coins, and therefore her conclusion was in error, and provided proof in the form of the Minister of Finance affidavit (TAB 59) that gold coins are indeed currency, and may circulate.
222. On May 26, 2015 Ms Gagnon responded (TAB 69), and made a new claim, that the *Customs Act* applies to the coins because they are “collector coins and their true value relates to the collector aspect”. It is not true that the *Customs Act*, or the *Excise Tax Act* discriminates between goods and currency based on value or collector aspect. The only determining factor for currency are Act such as the *Currency Act* and the *US Code Title 31 (Money of the United States)*
223. Ms. Gagnon drafted the Minister's Decision on May 28, 2015 and forwarded to Mr. Jeffrey Strickland for signing (TAB 70).
224. Also in her conclusions, Ms. Gagnon ignored not only all the evidence the plaintiff provided, but also Mr. Dancause's determination in his January 29 letter. In fact, she did not even note Mr. Dancause's letter in the case synopsis.

225. Ms. Gagnon therefore knew that the coins are not goods, and misrepresented the PCMLFA in order to support the seizure of \$6427.89 worth of property from the plaintiff. The \$6427.89 represents the cost the plaintiff paid, and therefore the replacement value of the coin. For every purpose, the plaintiff was deprived of this amount of savings. While the face value of the coins is only \$220 USD when used as legal tender, the plaintiff did not intend to use it as such.

226. Ms. Gagnon also acted maliciously, in a high handed fashion, ignoring all the evidence the plaintiff submitted in support of his appeal, and relied instead on he own opinions of and those of colleagues, while ignoring also Mr. Dancause's statutory evidence, and his advice, which did not accord with her goals.

227. Therefore, Ms. Gagnon committed fraud over \$5000 consistent with the Criminal Act s.380, and did so in order to facilitate money laundering.

Claims against Jeffrey Strickland

228. In his June 1st 2015 decision on behalf of the Minister (TAB 4), Jeffrey Strickland acted maliciously to support depriving the plaintiff of \$6427.89, by knowing of and ignoring the evidence before him, and by misrepresenting the PCMLTFA, and by reiterating the same arguments that Ms Kendall and Ms Gagnon had made.

229. Ms. Gagnon therefore knew that the coins are not goods, and misrepresented the PCMLFA in order to support the seizure of \$6427.89 worth of property from the plaintiff. The \$6427.89 represents the cost the plaintiff paid, and therefore the replacement value of the coin. For every purpose, the plaintiff was deprived of this amount of savings. While the face value of the coins is only \$220 USD when used as legal tender, the plaintiff did not intend to use it as such.

230. Ms. Gagnon also acted maliciously, in a high handed fashion, ignoring all the evidence the plaintiff submitted in support of his appeal, and relied instead on he own opinions of and those of colleagues, while ignoring also Mr. Dancause's statutory evidence, and his advice, which did not accord with her goals.

231. Therefore, Ms. Gagnon committed fraud over \$5000 consistent with the Criminal Act s.380, and did so in order to facilitate money laundering.

Claims against Joanne Lepage

232. On August 31, 2011, Ms Joanne Lepage, a veteran of the CBSA (employed with the CCRA and then CBSA since May 1990, per Discovery of the Defendant, question 11 at TAB 20), in her function of Senior Program Adviser with the CBSA, provided assurances (letter, TAB 53) to Livingston Consulting, a customs broker, that an unnamed entity may import capital (funds) in the form of gold coins and bars into Canada, without any reporting requirements pursuant PCMLTFA.

233. In her letter, Ms. Lepage used the following definition of currency:

234. "Currency includes all foreign and domestic bank notes and circulation coins"

235. This definition does not appear anywhere in Canada's statute, and it is intended to replace the definition of "cash" from the PCMLTFR, shown above above at para 216. As such, Ms. Lepage misreresented the PCMLTFR, and in issuing assurances, has in effect made regulations, in contravention of the Canada Border Services Agency Act section 12(3)(b) (the Agency has no power to make regulations, TAB 72).

236. Ms. Lepage's should have known from the context of the Livingston Consulting letter that what is being requested is clearance to move money (word "capital" was used in the request) to Canada without submitting to Cross-Border Monetary Reporting Regulations, and that the items referred to are currency and financial instruments.

237. As a result Ms. Lepage facilitated money-laundering.

Responses to remaining representations in the defendant's motion

238. [re. Defendant's written para 4] The motion to amend the statement of claim does not seek mandamus. Mandamus would be an inappropriate remedy to criminal actions (facilitating money laundering).

239. [re. Defendant's para 6] Section 135 of the *Customs Act* allows for a full action in Federal Court, including discovery, joinder of claims, and all the other legal tools available in Federal Court. It is not expressly limited in scope, like for instance the *Excise Tax Act* s.81.28(3)(a), which explicitly says that "the rules concerning joinder of parties and causes of action do not apply except to permit the joinder of appeals under this Part". Section 106 of the *Customs Act* does not apply, as the officers in question were committing fraud, and not performing their duties under the *Customs Act*, or any other Act of Parliament. Furthermore, there is no limitation

of time of criminal charges such as fraud and facilitating money-laundering. With respect to the Minister's decision that is sought to be set aside, the claim was brought in an action commenced within the 3 month limitation, and is therefore proper.

240. [re. Defendant's para 6] The genuine issues are not limited to the two stated by the defendant, but they are listed in the statement of claim.

241. [re. Defendant's para 11] whether the coins are collector items, or not intended for circulation are not facts, but issues to be determined by the court.

242. [re. Defendant's para 19] As section 135 of the *Customs Act* allows for a full action in Federal Court, it follows that all remedies available from the Federal Court are available in this action.

243. [re Defendant's para 20] all the issues in this action are to be determined by the court, including criminal behaviour by CBSA employees, whether the CBSA facilitated money laundering, and whether it is a criminal organization within the meaning of the Criminal Code.

244. [re Defendant's para 21] The *Customs Act* places no limitation on the scope of an action brought pursuant section 135. In *Steinway v Canada*, 2010 FC 1208, the point of para 24 is that under s.135 it is not the amount of penalty, but rather whether an offence was committed or not. It does not imply that it is the exclusive issue to be determined, nor does the *Customs Act* say such a thing. Para 27 shows that with respect to the Minister's Decision, which makes is how an action starts, the only thing to be determined is how the decision is to be disposed of. It does not limit joinder of causes of action, which naturally should be decided on their merits, with the appropriate remedies being available. If Parliament intended to limit the scope of an action under section 135, they would have stated it, as they did in the Excise Tax Act s81.28(3)(a)

245. [re Defendant's para 22] Section 106 does not apply, it deals with officers performing their duties under the *Customs Act* or any other Act of Parliament, and not merely being at their place of employment, pretending to be customs officers.

246. [re Defendant's para 24] Indeed a request for mandamus can be brought separately, but does not need to be. There is no statute evidence that it must be brought separately. In any case, mandamus is not sought here.

247. [re. Defendant's para 29] Clearly from the definition of "cash", the qualifier "intended for circulation in Canada" applies only to notes issued by the Bank of Canada pursuant to the Bank of Canada Act, and not to

domestic or foreign coins, nor to foreign bank notes. The origin of the “intended for circulation in Canada” is explained above at para 219. Defendant also omitted to emphasise the words “in Canada” which make integral part of the circulation qualifier.

248. [re. Defendant's para 30] As it deals with money and things that are money-like, the PCMLTFR mentions gold and silver coins. This goes to the merits of the plaintiff's claims.

249. [re. Defendant's para 31] Using a dictionary definition is not appropriate when more precise legal definitions exist in the *Currency Act* and *US Code Title 31*.

250. [re. Defendant's para 32] There is no statutory mention of the “collector” status affecting the “currency” status. If there were, all currency would be collector goods, as currency is one of the most collected things world wide. The rest of the argument regarding the envisioned \$2 coffee is addressed above at para 106.

251. [re. Defendant's para 33] Circulation does not affect currency. Once it is issued, it's currency until it is called in. The *Currency Act* s.7 makes no distinction between the different kinds of coins.

252. [re. Defendant's para 34] The US Code Title 31 does not mention circulation at all, implying all coins are equal with respect to their status as currency and legal tender. It also does not say that quarters or dimes are currency. However, it does list all coins under the title “CHAPTER 51 – COINS AND CURRENCY”, under the subtitle “SUBTITLE IV - MONEY”. The defendant is obviously grasping at straws as he does in the entirety of his defense. As shown in the representations above his position shows his true intent is to facilitate money laundering.

253. [re. Defendant's para 35] The *Currency Act* section 8(2.1) shows that coins with a denomination greater than ten dollars may be used as legal tender. This includes most, but not all precious metal coins. Some precious metal coins are denominated as one cent, three cents, five cents, etc, as shown in the *Royal Canadian Mint Act* Part 1 of the Schedule. These lower denominations may be used just as described by the *Currency Act* s.8(2)(a-e).

254. [re. Defendant's para 36] is addressed above at para 106.

255. [re. Defendant's para 38] as per US Mint Procedures to Qualify for Bulk Purchase of Gold and Platinum bullion Coins (TAB 73), section II, para 3, the coins are distributed through “hundreds of coin and precious metal dealers, participating banks, brokerage companies and other financial intermediaries” (underlined for emphasis). So yes, banks, financial intermediaries and coin dealers alike are selected by the US Government to distribute

coins. Besides, currency is not the monopoly of commerce, you can get currency at any store, and from any person. Anyone who ever needed to break a banknote into coins knows this; you don't need to go to a bank to exchange banknotes for coins. But indeed, as banks deal exclusively in money-related products, it follows that if they distribute gold and silver coins, those must be money. In fact in Canada, banks distribute gold and silver coins and bars as well (TAB 38)

256. [re. Defendant's para 39] Anyone in Canada can hold any foreign currency they wish, even if they can't use it in Canada. Also, someone holding any currency is not obligated to spend it (ie "to use it as currency"). Collecting currency is not a way of "using" it, but a way of "not using it", which is also allowed by the *Currency Act*.

Order Sought

257. The plaintiff requests Summary Judgement:

- (a) Determine any issues that can be confidently be determined based on the evidence.
- (b) Make any orders the Court deems just.

Right to Request a Minister's Decision

If you wish to file an objection to this enforcement action and request a decision of the Minister of Public Safety, you must give notice in writing to the CBSA. Your objection may either be filed online via the CBSA web site at <http://www.cbsa-asfc.gc.ca/recourse-recours/menu-eng.html> under E-Appeals or you may send your written notice by mail to the:

Canada Border Services Agency
Recourse Directorate
1686 Woodward Dr.
Ottawa ON K1A 0L8

This request must be filed within 90 days after the date the enforcement action was taken. If you are past the 90 days for requesting a decision of the Minister of Public Safety, the Minister may, under exceptional circumstances, extend this time limit up to an additional year pursuant to section 129.1 of the Customs Act. In this respect, you must apply in writing to the Minister, outlining the reasons why your request for a decision was not filed within the 90 days set out in subsection 129(1) of the Act. The request for an extension is to be sent to:

Canada Border Services Agency
Recourse Directorate
1686 Woodward Dr.
Ottawa ON K1A 0L8

Third Party Claims - Attention

If you are aware of any persons, with the exception of the above named, that may have an interest in the things seized or detained as owner, mortgagee, hypothecary creditor, lien-holder or holder of any like interest, please advise them to contact the CBSA, Recourse Directorate, Ottawa ON K1A 0L8, within 90 days after the date the enforcement action was taken, for further information.

Note: The information on this form is collected for the purpose of assisting officers of the CBSA in their enforcement activities and is protected under the provision of the Privacy Act.

Droit de demander au ministre de rendre une décision

Si vous désirez contester cette mesure d'exécution et demander au Ministre de la sécurité publique de rendre une décision, vous devez envoyer un avis écrit. Votre demande peut être envoyée soit électroniquement sur le site Internet de l'ASFC à l'adresse suivante <http://www.cbsa-asfc.gc.ca/recourse-recours/menu-fra.html> sous la rubrique Appels électroniques ou par la poste à:

L'agence des services frontaliers du Canada
Direction des recours
1686 Woodward Dr.
Ottawa ON K1A 0L8

Cette demande doit être présentée dans les 90 jours suivant la date de la prise de la mesure d'exécution. Si le délai de 90 jours au cours duquel vous pouvez demander au ministre de la sécurité publique de rendre une décision est expiré, le ministre peut, dans des circonstances exceptionnelles, proroger ce délai d'une période maximale d'un an conformément à l'article 129.1 de la Loi sur les douanes. À cet égard, vous devez envoyer un avis écrit au ministre afin de lui expliquer les raisons pour lesquelles votre demande n'a pas été présentée dans le délai de 90 jours prévu au paragraphe 129(1) de la Loi sur les douanes. La demande de prorogation doit être envoyée à:

L'agence des services frontaliers du Canada
Direction des recours
1686 Woodward Dr.
Ottawa ON K1A 0L8

Revendication des tiers - Attention

Si vous connaissez toute personne, sauf la personne nommée ci-dessus, qui pourrait avoir un intérêt dans les biens saisis ou d'être tenus à titre de propriétaire, de créancier-détenteur d'hypothécaire, de titulaire de privilège ou de titulaire d'un droit analogue, veuillez leur indiquer de communiquer avec l'Agence des Services frontaliers du Canada, Direction des recours, Ottawa ON, K1A 0L8, dans les 90 jours suivant la date de la mesure d'exécution, pour plus de renseignements.

Subject: Request for a Ministerial Decision - CS-74472/4273-14-0724

I am writing to inform you of the ministerial decision on the above-noted appeal.

I have reviewed the enforcement action, the evidence and the law as it applies to your case. I have fully considered the documentation you provided as well as the reports from the issuing office.

Decision

After considering all of the circumstances, I have decided, under the provisions of section 131 of the *Customs Act*, that there has been a contravention of the *Customs Act* or the Regulations in respect of the goods that were seized;

Under the provisions of section 133 of the *Customs Act*, the goods under seizure shall be returned to the appellant upon receipt of an amount of \$321.39 to be held as forfeit. If release of the goods is not taken on the foregoing terms, within 90 days from the date of this notice, they will be forfeited and disposed of.

Reasons

On October 21, 2014, you presented yourself to Canada Border Services Agency (CBSA) officials at the Queenston Bridge in Niagara-on-the-Lake, ON where you failed to report the importation of United States (US) gold and silver coins. It was determined that you had purchased these coins in the United States the same day as your return to Canada at a value of \$5,700 USD. As you failed the report the importation of the coins as required by section 12 of the *Customs Act*, they were seized and offered for release upon payment of \$1,606.97 CAD.

.../3

Canada

You appealed the enforcement action on the basis that the coins are legal tender qualifying as monetary instruments and the importation did not need to be reported as their value was less than \$10,000 CAD. Additionally, as you were not questioned about the amount of currency or monetary instruments in your possession, you were not obliged to disclose the value of the currency or monetary instruments in your possession.

However, after a thorough review of the information, evidence, legislation and regulations applicable to these circumstances, it has been concluded that the coins in your possession on October 21, 2014 seized by CBSA officials were required to be reported pursuant to the *Customs Act*.

I have reached this conclusion with careful consideration given to the definition of "cash" as it appears in the *Proceeds of Crime Money Laundering and Terrorist Financing Regulations (PCMLTFR)*, and the relationship between the definition of "cash" in the Regulations and the term "currency" in the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act (PCMLTFA)*. In the French versions of the *Act* and the *Regulations*, the terms "cash" and "currency" are both represented as "espèces". As such, it is accepted that the definition for "cash" in the *Regulations* is the definition for "currency" in the *Act*.

The common denominator for the definition of currency is that the bank notes and coins must be intended for circulation to be considered as such. In the circumstances of this enforcement action, the coins were not intended for circulation. Consequently, they are not considered to be currency subject to the reporting requirements of the *PCMLTFA*, but are considered goods subject to the reporting requirements of the *Customs Act*.

All goods entering Canada, including gold and silver coins, must be reported to the CBSA in accordance with the *Customs Act*. The onus to do so falls upon the individual bringing the goods into the country whether or not prompted by a CBSA officer.

With respect to the supporting documentation you provided during the appeal process, that is the Canada Revenue Agency (CRA) *GST / HST Memoranda Series 17.1*, the sworn and signed Department of Finance document, the *US Public Law* document on 'Buffalo Gold Bullion Coins' and the *US Code Title 31* all relate to different applications for currency and not to the *Customs Act* or the *PCMLTFA*. Thus, while considered, these documents were given no weight in support of your appeal. As the latter two documents relate to US currency, they have no bearing on the *Customs Act*, the *PCMLTFA* or Canadian currency laws.

The information available to me confirms that the coins in question were acquired outside of Canada and were not properly reported to the CBSA. Consequently, a contravention of the *Customs Act* did occur and the coins in question were lawfully subject to seizure and forfeiture. However, the terms of release have been reduced to \$321.39 to better reflect the circumstances of this enforcement action.

Should you have any questions concerning the release of your goods, please contact the CBSA officials at the Queenston Bridge, Niagara-On-The-Lake, Ontario at (905) 354-9478.

To appeal the decision made pursuant to section 131, you may file an action in the Federal Court, in accordance with section 135 of the *Customs Act*. You must file your action within 90 days of the date of the mailing of this decision.

To appeal the decision made pursuant to section 133, you may appeal this decision by way of an application for judicial review under subsection 18.1(1) of the *Federal Courts Act*. An application to the Court must normally be filed within 30 days of the date of the mailing of this decision.

I trust that this letter satisfactorily explains the ministerial decision in this matter. If you have any questions, please contact the adjudicator, Martine Gagnon, at (343) 291-7223.

Yours truly,

Jeffrey Strickland
Senior Program Advisor

Excise Tax Act sections 50(1)(a), 50(1)(b) and 51

Tax Imposed

Consumption or sales taxM

- 50 (1)** There shall be imposed, levied and collected a consumption or sales tax at the rate prescribed in subsection (1.1) on the sale price or on the volume sold of all goods
 - (a) produced or manufactured in Canada
 - (i) payable, in any case other than a case mentioned in subparagraph (ii) or (iii), by the producer or manufacturer at the time when the goods are delivered to the purchaser or at the time when the property in the goods passes, whichever is the earlier,
 - (ii) payable, in a case where the contract for the sale of the goods, including a hire-purchase contract and any other contract under which property in the goods passes on satisfaction of a condition, provides that the sale price or other consideration shall be paid to the manufacturer or producer by instalments (whether the contract provides that the goods are to be delivered or property in the goods is to pass before or after payment of any or all instalments), by the producer or manufacturer at the time each of the instalments becomes payable in accordance with the terms of the contract, and
 - (iii) payable, in a case where the goods are for use by the producer or manufacturer thereof, by the producer or manufacturer at the time the goods are appropriated for use;
 - (b) imported into Canada, payable in accordance with the provisions of the *Customs Act* by the importer, owner or other person liable to pay duties under that Act;
 - (c) sold by a licensed wholesaler, payable by him at the time of delivery to the purchaser, and the tax shall be computed
 - (i) on the duty paid value of the goods, if they were imported by the licensed wholesaler, or
 - (ii) on the price for which the goods were purchased by the licensed wholesaler, if they were not imported by him, which price shall include the amount of the excise duties on goods sold in bond; or
 - (d) retained by a licensed wholesaler for his own use or for rental by him to others, payable by the licensed wholesaler at the time the goods are put to his own use or first rented to others, and the tax shall be computed
 - (i) on the aggregate of the duty paid value of the goods and the amount of any taxes payable on the goods under section 27, if they were imported by the licensed wholesaler, or
 - (ii) on the aggregate of the price paid by the licensed wholesaler for the goods, the amount of any excise duties payable on the goods if sold in bond and the amount of any taxes payable on the goods under section 27, if they were not imported by the licensed wholesaler.

TAB 8

Canada Revenue Agency Memo 17.1 (Definition of “Financial Instrument”)

GST/HST Memoranda Series

17.1 Definition of “Financial Instrument”

April 1999

Overview	This memorandum explains the components of the definition of “financial instrument” as it relates to the provision of financial services under the Goods and Services Tax (GST)/Harmonized Sales Tax (HST).
----------	---

Note This memorandum replaces GST/HST Memorandum 17.1, *Definition of “Financial Instrument”*, dated January 1995. Significant changes have been side-barred.

Note - HST Reference in this memorandum is made to supplies taxable at 7% or 15% (the rate of the HST). The 15% HST applies to supplies made in Nova Scotia, New Brunswick and Newfoundland (the “participating provinces”). If a person is uncertain as to whether the supply is made in a participating province, the person may refer to Technical Information Bulletin B-078, *Place of Supply Rules under the HST*, available from any Revenue Canada tax services office.

General

1. The definition of financial instrument is relevant for the definition of financial service. A financial service generally involves a transaction relating to a financial instrument or money.

Financial services 2. Supplies of financial services are exempt under Part VII of Schedule V unless specifically listed as zero-rated under Part IX of Schedule VI. Services for which fees are charged and which relate to financial instrument transactions are exempt where these transactions fall within the definition of financial service found in subsection 123(1).

Definition of financial instrument ss 123(1) 3. “Financial instrument” means:
(a) a debt security;
(b) an equity security;
(c) an insurance policy;
(d) an interest in a partnership, a trust or the estate of a deceased individual, or any right in respect of such an interest;
(e) a precious metal;
(f) an option or a contract for the future supply of a commodity, where the option or contract is traded on a recognized commodity exchange;

17.1 Definition of “Financial Instrument” (continued)

- (g) a prescribed instrument;
- (h) a guarantee, an acceptance or an indemnity in respect of anything described in paragraphs (a), (b), (d), (e) or (g); or
- (i) an option or a contract for the future supply of money or anything described in any of paragraphs (a) to (h).

Components of financial instrument 4. The following paragraphs explain the components of the definition of a financial instrument.

Debt security

- Definition of debt security
ss 123(1)** 5. “Debt security” means a right to be paid money and includes a deposit of money, but does not include a lease, licence or similar arrangement for the use of, or the right to use, property other than a financial instrument.
- Right to be paid money** 6. Financial obligations representing a right to be paid money are by definition a debt security for GST/HST purposes. A debt security generally includes a deposit of money, debentures, notes, convertible notes, mortgages, treasury bills, bonds, etc. It also includes book debts and accounts receivable.
- Exclusions** 7. The payment of money relating to leases, licences or similar arrangements, or the right to use property other than a financial instrument, is specifically excluded from the definition of debt security. Therefore, such a payment is not in respect of a financial instrument. For example, the leasing of commercial property is treated as a supply of that property, and not a debt security, for GST/HST purposes pursuant to subsection 136(1). Similarly, an automobile lease payment although partially consisting of a financing component is not exempt as consideration for a supply of a financial instrument.
- Contingent right
Policy statement
P-170, Whether or Not a Debt Security Includes Contingent Amounts Owing.** 8. “Debt security” does not include a contingent right. A right to be paid money is a possibility but not a certainty where a contingent right is involved. The payment is conditional upon the occurrence or non-occurrence of some future event that may never happen.
- Late payment charges** 9. A late payment charge occurs where a supplier of property or services charges the recipient (customer) an additional amount if payment for the supply is not made within the time required on the invoice. The late payment is a financial service as it relates to the operation of an overdue account (which is a debt security, and therefore a financial instrument).

17.1 Definition of “Financial Instrument” (continued)

Equity security

Definition of equity security
ss 123(1)

10. “Equity security” means a share of the capital stock of a corporation or any interest in or right to such a share.
11. A share of capital stock in a corporation representing ownership in the corporation or an interest in or right, claim or title to such a share is, for GST/HST purposes, a financial instrument.

Insurance policies

Definition of insurance policy
ss 123(1)

12. For GST/HST purposes, “insurance policy” means:
 - (a) a policy or contract of insurance, including life, property and casualty policies, but excluding a warranty contract (as explained in paragraph 23), that is issued by an insurer, including
 - (i) a reinsurance policy,
 - (ii) an annuity contract or a contract that would be an annuity contract except that the payments under the contract
 - are payable on a periodic basis at intervals that are longer or shorter than one year, or
 - vary in amount depending on the value of a specified group of assets or changes in interest rates, and
 - (iii) a segregated funds contract;
 - (b) a policy or contract relating to accident and sickness insurance whether issued or entered into by an insurer; and
 - (c) certain types of construction bonds (see paragraph 17 for more information).

Definition of insurer
ss 123(1)

13. “Insurer” means a person who is licensed or otherwise authorized under the laws of Canada or a province to carry on in Canada an insurance business or under the laws of another jurisdiction to carry on in that other jurisdiction an insurance business.

14. Generally, an insurance policy is a contract whereby one person undertakes to indemnify another against loss, damage or liability arising from an unknown or contingent event, and applies only to some contingency or act that may occur in the future. It is an agreement by which one party, for a consideration, promises to pay money or its equivalent, or to perform an act valuable to the other party upon destruction, loss or injury of something in which the other party has an insurable interest.

17.1 Definition of “Financial Instrument” (continued)

Health insurance contracts	15. Health insurance contracts such as accident or sickness insurance pertain to reimbursement for eligible medical, hospital, nursing, dental and certain other health-related expenses. These contracts cover payment for the cost of specified medical or dental services and loss of earnings, and provide an amount in compensation for accidental death or dismemberment. These contracts are included in the definition of an insurance policy whether or not provided by an insurer.
Supplementary health insurance	16. Contracts or policies issued by certain organizations that are not insurers, but provide supplementary health insurance in Canada and are licensed under the <i>Prepaid Hospital and Medical Act</i> (e.g., Blue Cross as well as certain corporations or associations providing accident and sickness policy benefits to their employees under self-insurance plans administered by a third party) are also included in the definition of an insurance policy.
Construction bonds	17. Construction bonds are bid, performance, maintenance or payment bonds issued in respect of a construction contract. These bonds are generally three-party contracts between a surety company, a contractor and an owner or developer of a project. The bonds, as a form of financial guarantee, are used in the construction industry to guarantee performance of a construction contract or the payment of suppliers. <ul style="list-style-type: none">• Bid bond• Performance bond• Maintenance bond• Payment bond 18. A bid bond guarantees that the contractor, if selected, will enter into the contract for the bid amount and will provide the required contract security. 19. A performance bond guarantees completion of the construction contract. 20. A maintenance bond guarantees against defects in the contractor's workmanship or materials for a period of time following completion of the construction contract. 21. A payment bond guarantees that the contractor will pay its subcontractors, labourers and suppliers on the bonded construction contract. 22. The issuers (usually surety companies) of these construction bonds are normally required to be licensed under the same legislation as insurers. Even though these unique bonds are not normally considered to be contracts of insurance, they do strongly resemble insurance policies. Therefore, for GST/HST purposes, they are treated as insurance and included in the definition of an insurance policy.
Exclusions	23. The definition of insurance policy, however, excludes a warranty in respect of the quality, fitness or performance of tangible property where the warranty is supplied to a person who acquires the property otherwise than for resale (i.e., for personal use) whether or not it is provided by an insurer. 24. Insurance services provided by non-licensed persons are also excluded from the definition of insurance policy except in the case of: <ul style="list-style-type: none">a) accident and sickness insurance as described in paragraphs 15 and 16, andb) in some instances, construction bonds as described in paragraph 17.

17.1 Definition of “Financial Instrument” (continued)

Interest in a partnership, trust or estate of a deceased individual

Terms	<p>25. A partnership is created where two or more persons enter into a relationship to carry on business for profit. A trust is a fiduciary relationship imposed by contract or by law with respect to property or money held by one person for the benefit of one or more persons. A partnership, a trust and the estate of a deceased individual are treated as separate persons under the Act.</p> <p>26. Any interest, or any right in respect of an interest, in a partnership, a trust or the estate of a deceased individual is a financial instrument. This interest or right represents a claim, title or legal share of an investment in a partnership, a trust or the estate of a deceased individual and not in the underlying assets of the partnership, trust or the estate of a deceased individual.</p>
-------	--

Precious metals

Definition of precious metal ss 123(1)	<p>27. A “precious metal” is a bar, ingot, coin or wafer of gold, platinum or silver that is refined to a purity level of at least</p> <ul style="list-style-type: none">a) 99.5% in the case of gold and platinum, andb) 99.9% in the case of silver.
Policy statement P-192, <i>Supplies of Precious Metals</i>	<p>28. A precious metal in the form of a bar, ingot or wafer at the required purity levels must generally be recognized and accepted for trading on Canadian financial markets. Ordinarily, these will bear markings indicating their purity level. They will also have an identification mark of the issuing financial institution or refinery. With respect to coins, only those metals at the required purity levels that have been issued by a government authority and that may be used as currency will qualify.</p> <p>29. Any supply of a precious metal (i.e., gold, platinum or silver) meeting the purity requirements, as set out in the definition of precious metal in subsection 123(1), is a supply of a financial service and generally exempt. Metals of this quality are normally investment-related and are usually bought and sold on international exchanges that establish world-wide precious metal prices.</p> <p>30. The sale or purchase of a precious metal, in the course of a commercial activity, that does not comply with the defined requirements is not considered a supply of a financial instrument, but rather a supply of property. Generally, the sale of gold, platinum or silver in bar, ingot, coin or wafer form with a purity level of less than 99.5% for gold and platinum, and less than 99.9% for silver is taxable at 7% or 15%. The sale of gold, platinum or silver at the defined purity levels, but not in the form of a bar, ingot, coin or wafer (e.g., in granular form), is taxable at 7% or 15%.</p>
Refiner	<p>31. A refiner of precious metals is considered to be any person who in the regular course of business converts or refines gold, platinum or silver regardless of the degree of purity.</p>

17.1 Definition of “Financial Instrument” (continued)

- Zero-rated supply
Sch. VI, Part IX, s 3 32. A supply of precious metals, as described in paragraphs 27 and 28, made by the refiner thereof or by the person on whose behalf the precious metals were refined is a zero-rated financial service. Accordingly, the first sale of newly refined precious metal by the refiner or its owner is zero-rated. Subsequent supplies of the precious metal are exempt.
- Refiner's fee 33. Where a refining or a manufacturing fee is charged by a refiner of precious metals to the owner of the precious metals, this fee is taxable. However, where it is standard practice for a refiner to charge a separate premium fee when selling its own precious metal that is over and above the intrinsic precious metal value of the product, this fee is considered part of the selling price, and therefore would take on the tax status of the sale of the precious metal.
- Non-precious metals 34. Carat gold, sterling silver or platinum in jewellery or chattel form are examples of metals that do not meet the purity and form requirements established under subsection 123(1), and therefore are not considered to be precious metals. Supplies of these goods are taxable at 7% or 15%, unless otherwise zero-rated in Schedule VI or exempted under Schedule V.
- Supplies to non-residents
Sch. VI, Part IX, s 1 35. Precious metals supplied by a financial institution to a non-resident person are zero-rated.
- Imports
Sch. VII, s 8 36. Precious metals imported under any circumstances are prescribed by the *Non-Taxable Imported Goods (GST) Regulations*, and are therefore non-taxable imports by virtue of section 8 of Schedule VII.

Options or contracts traded on recognized commodity exchanges

- Financial instruments 37. A commodity option or commodity future contract is a financial instrument for GST/HST purposes when traded on a recognized commodity exchange, such as the Winnipeg Commodity Exchange.
- Options 38. An option for the future supply of a commodity includes a right, but not an obligation, to buy or sell a commodity at a specified price within a stipulated future time period. The option buyer pays a premium to the dealer for this right, in addition to the usual commission. The supply of a commodity option where sold on a recognized commodity exchange is a financial service provided under paragraph (d) of the definition of financial service in subsection 123(1). However, the taxable status of the underlying commodity, if the option is exercised, is either taxable at 7% or 15% or exempt depending on the nature of the supply.

17.1 Definition of “Financial Instrument” (continued)

- Futures contract 39. A futures contract is an agreement to buy or sell a specific amount of a commodity at a particular price on a stipulated future date. Contrary to a commodity option, a futures contract obligates the buyer to purchase the underlying commodity and the seller to sell it, unless the contract is sold to another before the exercise date. The supply of a futures contract where sold on a recognized commodity exchange is also a financial service provided under paragraph (d) of the definition of financial service in subsection 123(1). However, the taxable status of the underlying commodity when the exercise date becomes due is either taxable or exempt depending on the nature of the supply.

Prescribed instruments

40. Paragraph (g) of the definition of financial instrument provides for additional categories of financial instruments. To date, no regulations have been promulgated.

Guarantees, acceptances or indemnities

- Guarantee 41. A guarantee includes an undertaking by a person to pay money or perform obligations with respect to a financial instrument provided under paragraphs (a), (b), (d), (e), and (g) of the definition of financial instrument in subsection 123(1), should the person primarily liable for the payment of a debt or obligation fail to execute that person's responsibility. For example, a guarantee bond is considered to be a financial instrument. A guarantee bond is a guarantee wherein the principal and interest may be guaranteed by a party other than the issuer. This situation may arise in parent-subsidiary relationships where bonds issued by a subsidiary are guaranteed by the parent.
- Acceptance 42. An acceptance in respect of paragraphs (a), (b), (d), (e) and (g) of the definition of financial instrument will include a formal indication by a person of its acceptance or guarantee that a financial instrument will be paid (e.g., Banker's Acceptance). An acceptance agreement is created, for example, when the drawee of a financial instrument writes “accepted” and a designated date of payment on the instrument and the drawee is responsible for payment at maturity.
- Indemnity 43. An indemnity in respect of paragraphs (a), (b), (d),(e) and (g) of the definition of financial instrument refers to a collateral contract or agreement by which one person agrees to indemnify another against an anticipated loss. It is an undertaking to be liable to pay money or perform an obligation in respect of the financial instrument (e.g., indemnity bond).
44. Guarantees, acceptances or indemnities pertaining to financial instruments defined in paragraphs (a), (b), (d), (e) or (g) of the definition of financial instrument are also defined (in paragraph (h)) to be themselves financial instruments for GST/HST purposes. Therefore, financial services relating to these guarantees, acceptances or indemnities will generally be exempt.

17.1 Definition of “Financial Instrument” (continued)

Options and contracts

- | | |
|----------|---|
| Options | 45. An option for the future supply of money or a financial instrument described in paragraphs (a) to (h) of the definition of financial instrument refers to a right, but not an obligation, to buy or sell money or a financial instrument at a specified price within a stipulated future time period. |
| Contract | 46. A contract for the future supply of money or a financial instrument described in paragraphs (a) to (h) of the definition of financial instrument refers to an agreement to buy or sell the above at a stipulated future date. For example, a future contract to purchase or sell US dollars at a specified price on a stipulated future date is a financial instrument. |

TAB 9

Non-Taxable Imported Goods (GST/HST) Regulations s3(a)

Prescribed Goods and Circumstances

3 For the purposes of section 8 of Schedule VII to the Act, the following goods and circumstances are prescribed:

- (a) precious metals imported under any circumstances;
 - (b) unwrought silver, gold or platinum, waste and scrap of precious metal or of metal clad with precious metal, and concentrates of silver, gold or platinum, where imported for the purpose of being refined into precious metals;
- [...]

TAB 10

Currency Act, s.7-8, 11, 15, 17, 21

Current Coins

Current coins

- **7 (1)** A coin is current for the amount of its denomination in the currency of Canada if it was issued under the authority of
 - (a) the *Royal Canadian Mint Act*; or
 - (b) the Crown in any province of Canada before it became part of Canada and if the coin was, immediately before October 15, 1952, current and legal tender in Canada.
- **Defaced coins not current**
 - **(2)** No coin that is bent, mutilated or defaced, or that has been reduced in weight otherwise than by abrasion through ordinary use, shall pass current.
- R.S., 1985, c. C-52, s. 7;
- 1999, c. 4, s. 11.

Legal Tender

Legal tender

- **8 (1)** Subject to this section, a tender of payment of money is a legal tender if it is made
 - (a) in coins that are current under section 7; and
 - (b) in notes issued by the Bank of Canada pursuant to the *Bank of Canada Act* intended for circulation in Canada.
- **Limitation**
 - **(2)** A payment in coins referred to in subsection (1) is a legal tender for no more than the following amounts for the following denominations of coins:
 - (a) forty dollars if the denomination is two dollars or greater but does not exceed ten dollars;
 - (b) twenty-five dollars if the denomination is one dollar;
 - (c) ten dollars if the denomination is ten cents or greater but less than one dollar;
 - (d) five dollars if the denomination is five cents; and
 - (e) twenty-five cents if the denomination is one cent.
- **Coins of denominations greater than ten dollars**
 - **(2.1)** In the case of coins of a denomination greater than ten dollars, a payment referred to in subsection (1) may consist of not more than one coin, and the payment is a legal tender for no more than the value of a single coin of that denomination.
- **Different amounts payable on the same day**
 - **(3)** For the purposes of subsections (2) and (2.1), where more than one amount is payable by one person to another on the same day under one or more obligations, the total of those amounts is deemed to be one amount due and payable on that day.

Melting Coins

Melting down coins

•**11 (1)** No person shall, except in accordance with a licence granted by the Minister, melt down, break up or use otherwise than as currency any coin that is current and legal tender in Canada.

•

• **Offence and punishment**

(2) Every person who contravenes subsection (1) or any condition attached to a licence referred to in that subsection is liable on summary conviction to a fine not exceeding two hundred and fifty dollars or to imprisonment for a term not exceeding twelve months or to both, and, in addition to any fine or imprisonment imposed, the court may order that the articles by means of or in relation to which the offence was committed be forfeited to Her Majesty.

[...]

Valuation of gold, etc.

15 Notwithstanding any other law, where any law of Canada or any treaty, convention, contract or agreement to which Canada is a party makes reference to

- (a)** a currency of a country other than Canada,
- (b)** a unit of account that is defined in terms of currencies of two or more countries,
- (c)** gold, or
- (d)** a combination of any of the things mentioned in paragraphs (a) to (c), the Governor in Council may make regulations specifying, or specifying the means or method of ascertaining, determining or calculating, the equivalent dollar value of that currency, unit of account, gold or combination thereof.

[...]

PART II

Exchange Fund Account

Exchange Fund Account continued

17 The special account in the name of the Minister known as the Exchange Fund Account, established to aid in the control and protection of the external value of the monetary unit of Canada, is continued and all assets acquired and held by or on behalf of the Minister in the Exchange Fund Account continue to be so held.

Policy

• **17.1 (1)** The Minister may establish a policy concerning the investment of the assets held in the Exchange Fund Account, including concerning the acquisition of assets to be held in the Exchange Fund Account, based on principles that a person of ordinary prudence would apply in dealing with the property of others.

- **Non-delegation of power**

(2) The Minister may not delegate the power to establish the policy.

- *Statutory Instruments Act*

(3) The *Statutory Instruments Act* does not apply to the policy.

- 2005, c. 30, s. 113.

Power to acquire, sell, etc.

• **17.2 (1)** The Minister may acquire or borrow assets to be held in the Exchange Fund Account, and sell or lend those assets, in order to carry out the policy.

- **Financial transactions**

(2) The Minister may carry out any transaction of a financial nature concerning assets held in the Exchange Fund Account that is in accordance with the policy.

- **Agents and mandataries**

(3) The Minister may appoint agents and mandataries to perform services concerning the Exchange Fund Account.

- **Delegation in writing**

(4) The Minister may delegate the powers set out in subsections (1) to (3) only in writing.

- 2005, c. 30, s. 113.

Crediting of Account

17.3 All amounts received by the Minister from transactions carried out under subsections 17.2(1) and (2) shall be credited to the Exchange Fund Account.

- 2005, c. 30, s. 113.

Contents of report

- (2) The report referred to in subsection (1) shall include
- (a) a summary of the policy established under subsection 17.1(1);
 - (b) the objectives of the Exchange Fund Account for that fiscal year, and a statement of whether those objectives have been met;
 - (c) the objectives of the Exchange Fund Account for the current fiscal year;
 - (d) the financial statements of the Exchange Fund Account; and
 - (e) a list of the agents and mandataries appointed by the Minister under subsection 17.2(3).

TAB 11

Currency Act, s.17 (2002-12-31 to 2005-12-29)

Exchange Fund Account continued

- 17 (1) The special account in the name of the Minister, known as the Exchange Fund Account, established pursuant to *The Exchange Fund Act*, chapter 60 of the Statutes of Canada, 1935, to aid in the control and protection of the external value of the monetary unit of Canada and continued by *The Foreign Exchange Control Act*, chapter 53 of the Statutes of Canada, 1946, is further continued, and all currency, deposits, securities and gold acquired and held by or on behalf of the Minister for the Exchange Fund Account shall continue to be so held.
-
- **Acquisitions**
 - (2) The Minister may, with assets held by or on behalf of the Minister for the Exchange Fund Account, acquire or cause to be acquired
 - (a) currencies designated by the Minister;
 - (b) units of account designated by the Minister;
 - (c) gold;
 - (d) deposits that are
 - (i) denominated in those currencies or units of account or in gold, and
 - (ii) held with the Bank of Canada or any other financial institution inside or outside Canada designated by the Minister; and
 - (e) securities or notes that are denominated in those currencies or units of account or in gold and are issued or guaranteed by the Government of Canada or by such
 - (i) government of another country,
 - (ii) agency or institution of the Government of Canada or of the government of another country,
 - (iii) official international financial organization, or
 - (iv) institution as is designated by the Minister.
- **Publication in *Canada Gazette***
 - (2.1) Within sixty days after making a designation under subsection (2), the Minister shall cause to be published in the *Canada Gazette* the name of the currency or unit of account designated or the criteria used by the Minister in making the designation under subparagraph (2)(d)(ii) or paragraph (2)(e).

• **Dealing in assets**

- (3) The Minister or an agent on behalf of the Minister may sell, lend, borrow or otherwise deal in currencies, units of account, gold, deposits or securities or notes described in subsection (2), on any terms and conditions that the Minister thinks fit, and may, for that purpose,
- (a) enter into and participate in
 - (i) futures, forward, option, repurchase and reverse repurchase agreements, and
 - (ii) derivative or associated instruments or products relating to those currencies, units of account, gold, deposits or securities or notes;
 - (b) accept any of those currencies, units of account, gold, deposits or securities or notes as security for any loan or undertaking; and
 - (c) give undertakings and give as security for the performance of the undertakings any assets held by or on behalf of the Minister for the Exchange Fund Account.

• **Publication in *Canada Gazette***

- (3.1) Within sixty days after the Minister appoints an agent under subsection (3) or a derivative or associated instrument or product is entered into or participated in under subparagraph (3)(a)(ii), the minister shall cause to be published in the *Canada Gazette* the name of the agent or a description of the derivative or associated instrument or product.

• **Crediting of Account**

- (4) There shall be credited to the Exchange Fund Account
- (a) the proceeds, earnings and interest from all transactions pursuant to subsection (3);
 - (b) all amounts received by the Minister on the maturity of any deposits and securities and notes held by or on behalf of the Minister for the Account; and
 - (c) all earnings and interest from the currencies, units of account, gold, deposits and securities and notes held by or on behalf of the Minister for the Account.
